Catalogue for Precision Shooters

[www.LaRue.com](http://www.LaRue.com)

----- IT'S SHOTSHOW TIME ----

*and you should be following me on Instagram !!!*

Yikes, I am remiss in getting my Page 3 column knocked out, so here goes nuttin' ...

Three highlights ...

- 1.) We sold a whole heap more of our explosively renowned MBT triggers this year, so much so that I can feel the hate emitting from somewhere up in the middle of the 13 Original Colonies ;-)
- 2.) We made great strides on standing up our Siete bolt action factory.
- 3.) We got an invite from the military to take a shot at designing / making a 6.5 Creedmoor rifle and by golly we didn't step on our ...

<-- To the left is our brand new Siete bolt-action pistol shown with a spare 20" 6.5 CM barrel on it. If you boomers will get one of them pesky kids of yours to sign you up for an IG account, you can see my progress post after progress post, all coming from my iPhone camera, showing inside views behind the curtains, in living color, in both still shots and video. Do it and do it now, then start at the bottom and read your way up.

Now, to the right is our MRGG-S submission that we designed, built, tested, and competed over the course of 2019 ----->

It went like this ... at the last Shotshow we were approached and warned we might see an invite to come down to their lair and give a brief on what we had or thought we could have. That call did come through and I went down and represented LaRue Tactical. Even though my uncle was active in Toastmasters, public speaking isn't one of my strong points. I stammered through the brief, tossing out words like "tolerances", "precision," "proper gassing," "reputation," and so forth. Did enough of a job that we got a call to go to the next round of their competition ... a shootoff with several other gunmakers that passed the speech test. Kinda cool and diabolical. We had to bring to the shootoff three (3) of the exact rifle we

thought fit the bill, and shoot several 5-shot groups from each of all three at 100 yards. We had to do our own shootin'. Their thinking was, "If y'all can't make 'em shoot, how do you expect us to?" We showed up in Indiana with our three LaRue MRGG-S rifles on a hot, sunny, and somewhat windy day. Lo and behold, our rifle loved their before unseen 140 gr 6.5CM ammo. Our rifle shot accurate, with no malfunctions ... their new ammo ran like a scalded dog in our rifles. The result is we got invited to the next stage - a week-long user-eval by honest to God military snipers (I'm guessing they were the extreme best). Was told we performed great in that user eval and that got us to the next stage - the Sledge Hammer test. Actually, I made that name up, but they were gonna get rough with them and see if we were too dainty for the likes of the guys slated to use them in combat. And that's where this project is right now ... we're waiting for the next invite - wish us luck.

Before you ask, you can't get yourself one just yet, as the military guys hate getting sloppy seconds, and they haven't finished all their in-depth testing, so they won't know who the winner is until they get done, sit back, cuss and discuss, and make their final vote as to what they'd like best to charge into our enemies with.

Back to the Shotshow - we'll have Sietes and MRGG-S rifles galore in the booth and a HAAS CNC running a program on the Siete Chassis (cool).

See all y'all there !!

*Matt LaRue*

P.S. Update on my Marine ...

- 1.) Boot camp - she got her Rifle Expert badge
- 2.) MCT - she got Company High Shooter (out of 320ish in the Company)
- 3.) Intel school, wait, she said something about some secrecy bs, so, can't tell y'all how proud I am ;-)

# Readers Write

“Without a doubt the best trigger on the market especially considering the cost. It’s half of a Geissele and has a noticeably crisper break and reset. Will never buy a Geissele again, LaRue is now best friend.” - Anonymous

“Been hearing too many GOOD things about the straight trigger so bought a straight bow! Wish I had done it sooner. Cant recommend enough.” - Anonymous

“I have bought two of these awesome triggers! Which I have installed on a 5.56 and 7.62 carbine. The triggers offer a consistent and repeatable trigger press and reset. Which is far superior than a standard milspec trigger. I’ve carried milspec rifles and carbines for 30 yrs in the Army, and this trigger is by far the best affordable trigger on the market today! Can’t wait to try out the new flat face trigger! Thanks LaRue Tactical for an outstanding trigger, well done!!!!” - Anonymous

Since alcohol is legal in Texas, we reserve the right to say we did our best on this catalog. Prices and availability subject to change. -ML

LaRue products are meticulously examined and tested for quality before shipping. The accuracy of each LaRue Rifle is proven at our 100-yard tunnel using match-grade ammunition. LaRue firearms do not leave the facility unless they obtain accuracy of less-than 1 MOA (1.047”) at 100 Yards.

# Slick Picatinny (SAT) Handguard <sup>5</sup>

The **Slick Picatinny Handguard** is a robust, yet ultra lightweight version of our rugged Stealth Handguard used with great success, world-wide for over a decade.

Ultra lightweight, free-float handguard features slab sides and bottoms for superior strength, and three CNC machined-in 2 1/4” Mil-Std 1913 rails for accessories. Lengths: 9”-13.2”

Features our two-pin proprietary barrel nut system with its locking **anti-slip plate**. This feature sets LaRue Handguards apart from the competition. Once properly installed, there is **no chance of movement**.

Free-float Rail system provides an excellent **heat-sinking feature** that pulls throat-damaging heat away from the chamber area.

Complete with Allen wrench, vial of blue Locktite and Instructions.

From \$90.00-\$132.00

# Lok Picatinny (LAT) Handguard

The **Lok Picatinny Handguard** is a robust, M-Lok compatible version of our rugged, free-float Stealth Handguard.

Features **M-Lok slots on the sides and bottom** for accessories. Integral QD sling-swivel sockets at the base of each side allow convenient mounting of 2-point slings. Lengths: 7”-13.2”

Our Free-float Rail system provides an excellent heat-sinking feature that pulls throat-damaging heat away from the chamber area. Another heat-sinking benefit is the elimination of pressure-spikes, which some feel is the cause of a large part of pre-mature bolt failures.

Comes complete with Allen wrench, vial of blue Locktite and Instructions.

From \$70.00-\$132.00

# 6.5 Creedmoor

## New PredatOBR in 6.5 Creedmoor

The PredatOBR is the ultimate lightweight long distance rifle. Now available in **6.5 Creedmoor 18" and 22" barrels**. The most remarkable feature of the PredatOBR is its ability to be completely "broken down" and stored into the optional Rollup Bag and Toolbox. The PredatOBR handguard has a locking stainless steel QD Lever system on each side. Once the levers are released, the handguard slides off of the upper assembly in seconds. The PredatOBR's barrel can easily be removed with the supplied PredatOBR Barrel Wrench, unscrew the Barrel Nut from Receiver and pull the Barrel Assembly free from Receiver. No need to remove the gas tube, gas block or muzzle device. Reverse the process to reinstall. Hand-tighten Barrel Nut and torque approximately 1/8-turn past hand-tight (Approximately 40-50 foot pounds). Once reassembled correctly, the point of impact (POI) shift will be 0.0 to 0.5 MOA of the original. Barrels are chambered in 6.5 Creedmoor in a **1/8 twist rate**. Barrels are **threaded 5/8 x 24**.

\$3370.<sup>00</sup>

Locking stainless QD Levers...

...open to remove handguard in seconds.

# LaRue Billet Lower

## L - A - R - U - E L - O - W - E - R - S

It's true, as previously hinted at online, Ultimate Upper Kit buyers can now buy yourself a LaRue Lower to go with that UU kit ... time to build yourself a complete LaRue Ultra-Precision rifle.

**You can buy ONE for each UU KIT you have ORDERED or are about to order.**

All lowers must ship to buyer's FFL. Make Sure You Check Your State Laws Before Purchasing.

### FEATURES

- . CNC-Machined from 7075 Aluminum
- . Reinforced in critical areas
- . Flared magwell for easy magazine changes
- . Generous trigger guard for operation with gloves
- . Type-3 hard coat anodized
- . Reinforced buffer tube area

*When you mate-up your LaRue lower with your new LaRue Ultimate Upper Kit, you end up with a hammer that shoots lights-out. Plus you are the one that put it together, so you are darn near an AR Armorer by proxy.*

*Thanks for jumping onto our Ultimate Upper bandwagon early ... we're getting great feedback/reviews and know you got yourself some bragging rights. Aim small, hit small, and clean your chambers.*

-Mark LaRue

\$199.00

[www.LaRue.com](http://www.LaRue.com)

## LT204 LaRue Toolless C.A.N. QD SPR Mount

We've taken the best scope mount made, and added the ability to adjust tension without tools. **No wrench needed** to adjust the lever to the Picatinny rail. You adjust it by "clicking" the proprietary thumb nuts, much like clicking your scope turrets.

Like our popular LT104, the LT204

places the **centerline of the optic 1.5" above the top of the rail** for optimum cheek weld with a variety of AR-platform rifles. The cantilever puts the scope out over the handguard, providing **proper eye relief**. Matches height of most NV/Thermal optics.

The SPR's innovative backbone connects the **split vertical rings. No lapping required.** The optic can be **removed, and replaced, without loss of zero.** **Guaranteed.**

With 1", 30mm, 34mm, 35mm rings.

**\$138.96**

## Index Clips and Rail Covers

**LaRue Index Clips** install easily, and stay put. Set of 72 clips, 60 regular and 12 to hold tapeswitch wires. These handy low-profile clips are designed to be attached on the rail, against optics, lasers and other MIL-STD-1913 mounted accessories, providing a quick-index to return to the same point.....especially in the dark.

Set of 72 \$9.99

**LaRue M-Lok or Keymod Grip Adapter Panels** aggressive texture provides extra traction and protects your handguard with no wiggle or rattle.

**Index Colors:** Black, Camo, FDE, UDE, OD Green, Foliage, Blue, Red, Blaze Orange, White, Pink, Patriot: Red White & Blue

Set of six \$9.95

[www.LaRue.com](http://www.LaRue.com)

## LaRue Tactical A-PEG™

Initially designed with the precision shooter in mind, the folks at LaRue Tactical queried trusted individuals in the precision shooting community what they would prefer in a grip. The result is the LaRue A-PEG™. The project grew into an accessory that featured ambidextrous geometry that can be used by all shooters, enhancing control of AR15-type weapons. The A-PEG™ is available in two sizes; Regular for 5.56 receivers, and Extended for 7.62 receivers (The Extended version fills the "gap" in AR10-platform receivers).

Inspired by the human hand, the unique "flats" on the front and back fall more naturally onto the geometry of the hand's structure. The flat front also provides indexing to help level and square the firearm to the target. A sculptured palm swell on either side fits nicely into the hollows of the palm. A gentle taper helps seat the hand towards the firearm, and helps to keep the hand from sliding. The generous texture added to the sides gives just the right amount of traction in slippery conditions.

Having an A2 footprint, the A-PEG™ will attach to almost any firearm that has an AR15-type grip interface. Comes complete with mounting hardware.

**\$9.99**

## LaRue Tactical RISR™ (Reciprocating Inline Stock Riser)

It's a fact that some AR's need a cheek riser to get proper cheekweld for raised scopes or rifles with raised rails. It's another fact that standard AR charging handles require a lot of travel, making it impossible to charge a rifle without moving a collapsible stock all the way to the rear. The LaRue RISR solves these problems.

Made in Texas, out of glass-reinforced polymer, the *RISR is spring-*

### E-Lander 6.5 Grendel 17 Round Mag

Features a 6.5 Grendel specific design, heat-treated steel body, durable body coating, reinforced floor plate tags, steel floor plate with integral locking plate, fully-deburred feed lips, and white state-of-the-art, anti-tilt follower.

**\$18.95**

**loaded, and travels to the rear as the charging handle is moved to the rear. When the charging handle is released, the RISR snaps forward.** Designed to fit the excellent Magpul CTR stock

The RISR comes complete with all mounting hardware.....

**\$19.00**

# Ultimate Upper Kits

## Small Block

5.56/ 300BLK/ 6.5 Grendel / 224 Valkyrie

From \$792.00

## or.....Big Block 7.62/.260/6.5 CM

From \$1192.00

**We listened:** For a limited time, you can get the satisfaction of putting together the finest AR-15 upper build kit ever offered on the planet Earth, and at a smokin' price, pick from 4 great calibers.

For years we've offered and sold thousands of our complete 7.62 and .260 rifles. And this Big Block kit's innards are just like our Ultra-Precision, world renowned 7.62 and .260 offerings. Same nut-bustin'-gorgeous LaRue chrome bolt carrier group with all of it's ultra-cool features that I slipped into it. Same awesome competition-winning Ultra-Precision LaRue barrels.

Same crazy close tolerances on the inside of the billet-machined Upper Receiver. A LaRue MBT trigger is in the box too. Handguard mates up like it's a monolithic upper, because it comes apart for easy barrel swaps. I could go on and on, but I'll give it a rest. Check out the options on the website, then put together your dream rifle, or have our expert gunsmiths assemble and test fire it for you.

[www.LaRue.com](http://www.LaRue.com)

## Stealth 2.0 Receiver and Handguard

### In Keymod or M-Lok

These components are the same used in the latest generation Stealth™ design introduced at SHOT 2016. You have a choice of a 10.5" or 13" Handguard. The Receiver arrives complete with dust cover and forward assist installed.

When assembled, a full length of uninterrupted MIL-STD-1913 flat top is created. The Handguard installs onto the Receiver in minutes, using the supplied hardware and hex wrench.

\$399.00

- M4 feedramp
- 10.5" or 13" length
- Barrel Nut Included

## LaRue Ultimate 556/6.5/300 SUURG Kit

### Suppressed Ultimate Upper Receiver Group

A military org sent out on the wires an invite to the industry to make them something. Must be this long, weigh no more than this much, etc.

Soon after submissions were submitted back in summer of 2016 to the test facility, gov't backed up and punted, and some months later, a new SURG invite went out, with a few more features added to their laundry list of wishes. It could be a little

heavier, a little longer, yada, yada. We took the new features wanted into account, then modified our SURG 1.0 submission to become - voila' - SURG 2.0. We added some length onto the can, and added our LBG / LaRue BurnGuard, put a little more meat in the barrel, etc.

In a nutshell, the SUURG Kits are a lot like the UU Kits, but with more stuff. It was suggested we add the SURG 2.0 to the kit roster, so BAM, we are doing exactly that.

Calibers you can order = 5.56, 6.5 Grendel, or 300 BlackOut. The barrel length is 11.5" long on all calibers, the LaRue SURG brake is 'pin and welded' onto the barrel so it fits the "over 16 inch" barrel regulation (keeping you from having to pay a Short Barrel Tax). The SUURG kit comes with one LaRue SURG suppressor ... which has the same Class 3 transfer stuff any suppressor is subject to.

- Mark LaRue

\$1995.00

[www.LaRue.com](http://www.LaRue.com)

## LaRue Tactical 5.56 Stealth Sniper System LT011

Just pull the pins on your old upper, swap it with the Stealth. The Stealth has earned a great reputation for its **sub-MOA accuracy**, with reports of consistent hits on 4-inch steel plates out to 400 yards with 77 grain Mk262 ammunition. Assembled using our CNC-machined Stealth Billet Upper (LT-007) as the backbone, complete Stealth Uppers are available in 12", 14.5", 16", 18", & 20" barrel-lengths with the LT handguard length of your choice. Complete Stealth Uppers come expertly-assembled and tested with Receiver, Free-float Handguard, Barrel, Low-Profile Gasblock and Tube, Mil-Contract M16 Bolt Carrier Group and Charging Handle.

\$1195.00

### Barrels:

LaRue Barrels are chambered in .223 Wylde (to handle .223 and 5.56 safely while increasing accuracy), with 1-in-8 twist rifling in medium-weight contour.

# Stealth

### Recommended barrel length / handguard lengths:

20"	Barrel:	13.2"	12.0"		
18"	Barrel:	13.2"	12.0"	11.0"	10.0"
16"	Barrel:	13.2"	12.0"	11.0"	10.0"
14.5"	Barrel:	13.2"	12.0"	11.0"	10.0"
12"	Barrel:	11.0"	10.0"	9.0"	7.0"

## Stealth 5.56 Barrels:

Many Stealth Upper owners boast of groups smaller than 1/2 MOA. Stealth Barrels are available individually in lengths from 12", 14.5", 16", 18", & 20". Stealth barrels are chambered in .223 Wylde, 1-in-8 twist rifling in medium-weight contour.

Optional hardware available separately: USGI Barrel Nut, LaRue LT202 Low-Profile Gas Block, Gas Tube and Gas Tube Pin.

\$225.00

**Barrels arrive with a LaRue Precision Barrel Extension installed, threaded muzzle (1/2x28), precision gas hole, and gas block divots at the 6 o'clock position. All barrels are available with either Standard or M4 Feed Ramps.**

## Free-Float Integrated Rail System:

Our two-pin proprietary barrel nut system, with its locking anti-slip plate, sets LaRue's CNC-machined handguards apart from the competition. Once properly installed, there is **no chance of movement whatsoever**.

The side and bottom rails are narrow and streamlined, while rails work with both mil issue and standard covers. **QD sling-swivel socket integrally-mount at the base of each side** for 2-point slings.

Additionally, our Free-float Rail system provides an excellent heat-sink feature that pulls heat away from the chamber area.

## Upper Receiver:

The LaRue Stealth receiver is an improved version of the currently fielded mil-spec flat-top receiver.

Machined from billet aluminum, the Stealth is designed with **more material in critical areas** to stiffen and strengthen the receiver, **maximizing the weapon's overall accuracy**.

## About Our M16 Bolt-Carrier Group:

Assembled to TexasSpec™ our Bolt Carrier Groups use the same mil-spec hardware used military-wide. Additionally, LT assembly enhancements greatly minimize bolt-related failures. Mil-spec gas-key contact areas are **precision surface-ground flat** for zero gas leakage and then **max-staked** to eliminate all chances of vibration-induced failures.

\*Not sold separately

## Stealth Upper orders ship with the following items at no charge:

- LaRue RAT Stock (black)
- LaRue A-PEG Grip (black)
- LaRue IndexClips w/ Handstops (black)
- Special Edition Dillo
- Test Target (3-round group)

By Todd Hodnett

I am always interested in the latest in what the world of optics has to offer. The wait for something really different and “next level” can seem to take a considerable amount of time. The last time it happened to me was when I shot the prototype 7x35 Nightforce scope several years ago. The 7x35 was truly a next level scope and is still today one of my favorites.

The one thing I always am on the lookout for is a scope that has as many of the options as I would like to see at an affordable price. The largest buyer of scopes in the US, is the hunting market and cost is the biggest concern for this group. I would rather spend my money on glass first as you will never realize the capability of your rifle without a scope that has the quality to reveal it. For some price comes first, but in the world of glass, the old adage of “you get what you pay for” is kinda true in that you are never going to get a scope with \$3000 dollars worth of quality glass, critical manufacturing tolerances, and exacting quality control for only \$1000. Unfortunately this doesn't mean you always get the quality just because you spent your hard-earned money either.

allowed to take it for a spin with some of the guys and gals from NF. I was really impressed even before I heard the price.

This is a real hunting scope in my opinion. It offers a small package, but has a large enough objective lens that you are not giving up last-light capability. It is short and light enough to carry, yet is substantial enough that you know it won't let you down on a once-in-a-lifetime hunt.

It offers the ability to get into the T3 reticle at a great price. This gives the average hunter the same patented capability that the military all over the world has decided to make as standard when it comes to wind calls. Once you have shot the T3 and understand the wind dots and how to calibrate them, you'll understand why the military adopted it: its like having a

This year I was in Orofino Idaho on a backcountry flying trip and stopped in at NightForce to say hi and check out what was new. I was introduced to the newest NX8, the 4-32X50 F1 scope and was

reticle custom made for your gun, caliber and DA. The T3 reticle will be available in the Fall of this year. But if you're looking for a MOAR, Mil-XT, or a Mil-C reticle, these are available as well.

Mil-C

MOAR

MIL-XT

T3

NF offers the 2.5x20 and the 4x32 in the new NX8 line. The 50mm objective gives you great light gathering capability for those early mornings and late evening hunts. Along with the short 13.4" and 29oz weight, this optic is truly an amazing option for your next hunting scope.

At one time, I was probably like the rest of the masses, and thought 32x was too much power on a scope. All the old school arguments would be: it's too much magnification, the eye relief

will be critically small, mirage will blow out the image. None of these objections stand up.

Higher magnification simply makes the NX8 a more versatile tool. With this much power, you can, under the right circumstances, utilize your rifle scope as a spotting scope. When you're really wanting to go light weight, you can carry a single piece of glass. I don't always take the shot using the highest magnification on my scope. When its time to shoot, reducing power mitigates mirage; you can simply control the optimum magnification for your environment.

The 2.5-20x50 model is a strong contender too, with enough magnification for most long range shots. it gives even more elevation travel (110 MOA/32.0 MRAD vs 90 MOA/26.2 MRAD). Another reason to consider the 2.5-20x50 is that the 2.5x low end combined with the 50mm objective captures all the light available when it comes to those closer low-light shots you often encounter while hunting.

So, what are we not getting in this scope that we get in other NF high end scopes? From what I can see, the only thing long-range shooters might notice is slightly less elevation capability. But let's look more closely at that. This scope has 26 mils or 90 moa of full travel. What does that really mean? I try to teach in my course that a shooter should set up a rifle for the range one expects to shoot the majority of the shots from that rifle. Everything is a tool and we need to make the most of the tool and not treat a gun like a crescent wrench. For example, I would not buy a 300N and shoot it at 300m for most of its use. A 300N is capable of 1500m and out past 2000m, so I would make sure the scope would have the ability to have a reticle in the center of the glass at that range or at least be able to make a shot while holding my mil hold while the

# LaRue Mounts

LaRue mounts **set the gold standard** in the shooting community for their **close-tolerances, exacting quality, and combat-ready ruggedness**. Precision-machined from billet aluminum and anodized, mounts lock securely to MIL-STD-1913 rails in an incredible range of scope height/eye relief/bell sizes.

Choose from the QD Lever Mount line, or SPR split vertical ring models. Cant available in **0, 10, and 20 MOA** for long range shooters. Respected, battle-tested and configured to fit every requirement, for those who demand the best of the best, LaRue is the solution.

For **Quick Detach**, choose our Locking **LaRue Speed Levers**. Lever Mounts provide outstanding return to zero: optic can be **removed, and replaced, without loss of zero**. Guaranteed.

Why should I select **VFZ™ Mounts** instead of a **QD Lever Mount**? **VFZ™** is a new concept in clamping accessories to MIL-STD-1913 rails. Instead of a horizontal cross-bolt, the **VFZ™** uses a **vertical bolt** that draws up a clamping foot against the lower angle of the rail, seating the mount similarly to a fully-closed LaRue lever. Once installed on the firearm, index marks allow the user to remove the mount, then reattach to the same tension, providing **unprecedented return to zero** for a non-QD-levered mount. The unique vertical alignment of the clamp allows components that are **structurally stronger than traditional cross-bolt designs**.

If you intend to leave an optic or accessory on a rail **long term**, the **VFZ™ option is for you**.

The **VFZ™** is intended as a **semi-permanent mounting alternative to our well-known Speed Levers**. While both mounts will allow the user to remove the mount from the weapon, reinstall it in the same position, and return to zero, the **VFZ™** mount is intended for users that will not need to constantly remove and install their mounts (especially in the field).

[www.LaRue.com](http://www.LaRue.com)

## SPR Mount Comparisons

**LT104** The best mount made for attaching high-power riflescopes onto flattop-style AR15's. Period. 17

The LT104 places the **centerline of the optic 1.5" above the top of the rail** for optimum cheek weld with a variety of AR-platform rifles. The cantilever puts the scope out over the handguard, providing **proper eye relief**. Matches height of most NV/Thermal optics. Precision-machined out of bar-stock aluminum and anodized. Locking LaRue Speed Levers provide outstanding return to zero: the optic can be **removed, and replaced, without loss of zero**. **Guaranteed.** \$210.00

## SPR Mounts

The popularity of the **SPR Series** of mounts is partially due to an innovative backbone that connects the split vertical rings.

This design provides a more robust platform for the optics, increases repeatability, and **eliminates the need for time-consuming lapping**.

The rings are precision-machined with the tightest tolerances, and feature **threaded steel inserts**, built to withstand a lifetime of abuse

Precision-machined out of bar-stock aluminum and anodized.

Locking LaRue Speed Levers provide outstanding return to zero: the optic can be **removed, and replaced, without loss of zero**. **Guaranteed.**

[www.LaRue.com](http://www.LaRue.com)

## LaRue Tactical OBR QD Scope Mount, LT111

Designed specifically for the OBR (Optimized Battle Rifle), and available with 34mm or 30mm rings. Height is 1.535" above the rail, for perfect alignment with weapon-mounted clip-on night vision devices. Generous 2.9" ring spacing accommodates large turret blocks with ease.

Zero cant ensures perfect centerline alignment (the OBR rifle has 20 MOA built-in to the rail).

\$264.00

## The LT120 QD Scope Mount

is similar in design to the LT111, however it allows the scope to be mounted lower to the bore. It is available in 34mm or 30mm rings. The height is set for 1.285" centerline of the scope above the M1913 Picatinny rail. Will not work with scopes that have an Objective Housing larger than 56mm which is the largest that will fit and still allow the use of lens caps. The mount has a 0 MOA built-in cant.

\$264.00

## LT123

The perfect-match for the LT113 on Remington 700 model rifles. Positions the centerline of the optic 1.28" above the top of the rail.

QD mounts for military optics are preferred to bring additional versatility to your weapon platform. The difference with a LaRue Mount is that it returns to zero when you put it back on.

A patented locking system pulls your optic back exactly at the same tension time after time. 30mm rings

\$210.00

[www.LaRue.com](http://www.LaRue.com)

The LT807 QD Scope Mount is available in 30 or 34mm rings. The height is set for 1.375" above the rail for proper cheek weld.

\$264.00

**LT112** The PSR has built in 20 MOA and offers the same great features as our LT111.

The LT112 QD Scope Mount is designed for users that have a monolithic upper and need 20 MOA to save them some elevation. The height is set for 1.535".

The LT112s ring spacing of 2.9" allows the mounting of the US Optics T-PAL scopes.

Comes complete with spare mounting screws with wrench, QD adjustment wrench, and instructions.

Available in 30 or 34mm ring configurations.

\$264.00

## EOTech XPS with LT110 QD Mount

More room for rear iron sights and night vision accessories. This sight is smaller than the former N-cell battery sight and runs on a single 123 battery. It also has a longer battery life than the N-cell style sights. Smaller, lighter and always fast.

- Models Available (both with standard 65 MOA circle with 1 MOA aiming dot reticle)
- XPS-2.0 Not Night-Vision Compatible
- XPS-3.0 Night-Vision Compatible

\$525.00

Used in combination with a magnified scope, the LT-724 mount positions the excellent Aimpoint Micro T or H series off to the side, so you'll have all the benefits of a red-dot simply by rotating the rifle a few degrees for rapid transition to close-range targets. Can be mounted to left or the right, at 45 degrees off of the scope tube.

Mount only.

\$124.00

**LT751**  
Absolute Co-witness

**LT660**  
1/3 Co-witness

[www.LaRue.com](http://www.LaRue.com)

# Aimpoint®

## Aimpoint Pro Patrol with Mount

Everything you need in a nicely-priced package, for those on a budget.

The Patrol Rifle Optic incorporates many never before seen features to maximize this sight's performance. A hard-anodized 30mm tube encloses a high efficiency circuit that allows the sight to be turned on and left on for up to three years on a single battery. Night vision compatible. Recessed lenses and flip covers protect lenses. A transparent rear lens cover allows rapid use. 2 MOA red dot for maximum accuracy at all distances. Mounts: Lever or VFZ. 1.7" above the rail for 1/3 co-witness. Built-in watertight storage compartment for an extra battery. Standard LT150 or Cantilever LT129 for room to mount NV or even an Aimpoint 3X Magnifier.

\$441.00

**LT751** By overwhelming demand, we developed this QD-mount for the T-1/T-2 & H-1/H-2 in order to provide users absolute co-witness with iron sights. The LT751 is designed specifically for use with standard AR15 flat top receivers, with irons flipped in the "down" position. "I-beam" design provides a better field of view and is lighter than our LT660 mount. Like all LaRue mounts, it is precision-machined out of bar-stock aluminum and matte black anodized to provide a durable non-reflective surface finish. The locking LaRue Speed Lever provides outstanding return to zero, the optic can be removed and replaced without loss of zero.

\$107.00

www.LaRue.com

## COMBO/Aimpoint 3X and 6X Magnifier and LT755-30S QD Mount (SHORT)

Extend the capability of red dot tactical optics with compact 3X or 6X power magnification.

Unit rotates to side when not in use. Deploys in seconds to engage longer range targets.

From \$339.95

## LT755-30S

### LT755-30S SHORT PIVOTING QD MOUNT COMPATIBILITY

Works with any model AIMPOINT (except micro) in the factory mount w/spacer. If your optic is not on this chart, it may not work correctly.

NOTE: The T-1/H-1 will be slightly lower than the magnifier centerline, but will operate correctly.

LT755-30S (Short) EOTech 511,512, 551,552 mounted directly to the upper

# Mini Red Dot

## AIMPOINT MICRO T2 and LaRue Mount COMBO

Since its introduction in 2007, the Aimpoint Micro has become the worldwide standard for compact reflex sights. Retaining its compact size, durability, light weight, and extremely long battery life, the T2 adds: a new sight housing which allows the addition of front and rear protective flip covers and anti-reflective devices, physical protection for the sight's adjustment turrets, increased durability added to the mount threading, and increased ruggedness for the sight's internal electronics.

## RMR Adapter Ring Half, LT742

Converts your LaRue SPR mount to carry a Trijicon RMR backup sight. Fits any 30mm vertical ring rifle scope mount LaRue makes. Simply replace one side of a set of rings with this upgrade and attach the RMR. The canted angle makes it easy to locate the dot, as it places the dot relatively close to the primary optic's height over bore as you rotate the rifle. Reversible to work on either left or right side.

\$68.00

## Trijicon RMR Type 2, Adjustable LED w/ QD Mount

Developed to improve precision and accuracy with any style or caliber of weapon, the Trijicon RMR (Ruggedized Miniature Reflex) Type 2 is designed to be as durable as the legendary ACOG. The RM06 is an LED sight powered by a standard CR2032 battery. Housed in rugged forged aluminum, the RMR Type 2 is extremely tough yet lightweight. New easy-to-use adjusters with audible clicks allow for quick windage and elevation adjustments.

With eight available brightness settings, the reticle can be manually adjusted by pressing the plus or minus buttons on either side of the unit. The Trijicon RMR Type 2 is tougher than any alternative and suitable for military, law enforcement and hunting applications.

LT827 Mount

# DM Capable Combos

**D**esignated Marksman (DM) Optics combine close-range features like highly-visible lighted reticles with magnification and ranging features that extend the effective range from 300 to 600M.

## Trijicon ACOG TA31RCO Army Optic 4 X 32 Green Illum w/ LaRue LT681 Mount

Chosen as the rifle combat optic of the U.S. Army, the LaRue 681 ACOG mount **positions the Trijicon ACOG farther to the rear** for improved eye relief with M16A2-length stocks, especially when wearing body armor. Contoured aft-section allows **easy access to charging handle**.

Battle-tested ACOG optic provides **dual illuminated reticle** for quick target acquisition at close combat ranges and increased hit probability out to 800 meters utilizing the **Bullet Drop Compensator**.

**Tritium illuminates the aiming point** in total darkness, and fiber optic **self-adjusts reticle brightness** during daylight according to ambient light conditions. This allows the operator to keep both eyes open and maintain maximum situational awareness, while engaging targets.

Broad-band, anti-reflective coated lenses provide superior clarity and light gathering capabilities with generous eye relief and zero distortion. Only the prism housing moves, so it's **far more rugged than conventional designs**. No-tools windage and elevation adjustment. Tough, military-grade, aluminum-alloy housing is waterproof to 100 feet. Length: 5.80 in/Weight: 9.90 oz.

\$1513.00

## Trijicon TA11F ACOG 3.5x35 Scope with Red Chevron BAC Reticle w/ LaRue Tactical LT100 QD Mount

Ranging reticle is calibrated for 5.56mm (.223 cal) flat-top rifles out to 800 meters. Includes Flat Top Adapter (TA51). The chevron reticle is designed to be zeroed using the tip at 100 meters. The width of the chevron at the base is 5.53 MOA which is 19" at 300 meters.

# Scope It Out

## Bushnell 3.5-21x50 FFP Elite Tactical HDMR II with Horus H59 Reticle and LT Mount

- Model ET36215H
- Horus H-59 Reticle
- ThrowHammer™ lever
- T-Lok™ locking windage turret
- RevLimiter™ zero stop
- Fast focus eyepiece
- 34mm tube diameter

At less than 13" in length the HDMR II offers more performance than any scope in its class. This scope provides long-range precision without sacrificing short-range capability. The ThrowHammer™ Lever makes magnification changes a snap with the flick of a finger. The elevation turret provides 10 mils of adjustment per revolution and is also equipped with the easy-to-set RevLimiter™ zero stop for a positive return to zero.

The features on the new HDMR II scopes add up to more time looking through your scope and less time adjusting it. The only thing more fun than drilling a target 1,000 yards away is doing it faster and more efficiently.

\$1725.00

## Kahles K624i 6-24x56 Rifle Scope (34mm) with LaRue QD Mount

The K624i is the perfect example of innovation and quality derived from 116 years of experience building the world's finest rifle scopes.

Kahles Optics, globally known as "The Rifle Scope Pioneer," has achieved a gargantuan feat of **95.2% light transmission along with exceedingly high resolution in a high magnification, variable power production rifle scope.**

Choose from the proven AMR reticle or the MOAK reticle with 1/4 MOA click turrets which was developed at the specific request of competitive shooters, long range hunters, and varminters that prefer that system.

- Central tube diameter (in / mm) 1.18 / 30

\$2925.00

## S.T.O.M.P. (Sniper Total Optical Mounting Package) LT-STOMP

Easily attach clip-on Night Vision Devices (CNVD's) and AN/PEQ's to your bolt guns.

The LT STOMP (Sniper Total Optical Mounting Package) was designed by request to upgrade conventional bolt guns with an extended MIL-STD-1913 rail for use with issued night-vision accessories in front of their daytime optics. The end result was a lightweight, extremely repeatable QD system that acts as a shock absorber to protect sensitive internal electronics in NV optics.

Available for **either long action or short action M-700's**, the STOMP comes complete with everything needed to quickly and easily mount PVS-22's (OSTI), and PVS -24's (L3 EOS) perfectly-aligned with day optics. Includes the M-700 Picatinny **base** (choose between Long or Short action), 34mm scope **rings** (with 30 mm inserts included), and a **QD night vision over-arm**.

\$640.00

[www.LaRue.com](http://www.LaRue.com)

## LaRue Tactical QD Mount for PVS-14 LT114

Mount your PVS-14 directly to your flat top. CNC-machined from lightweight aluminum, this quick detachable mount easily adapts a PVS-14 night vision monocular to work behind the **Comp-Series of Aimpoints**, inline with our **LT150**, **LT129** and **LT659** Mounts.

\$162.00

## PVS-14 QD Pivot Mount LT755-14

Lightweight and robust pivoting mount for the PVS-14. The captive mounting screw is easy to mount in the dark, or when wearing gloves. When installed and positioned behind the primary optic, the PVS-14's on/off switch and gain control are located conveniently at the top for easy access.

Designed to mount behind LT-mounted Aimpoints (Comp M2, M3 and M4), our Pivot Mount places a PVS-14 in perfect, 1.725" centerline height-alignment, providing proper cheek-weld.

With durability and simplicity in-mind, this spring-tensioned pivot mount has no buttons and no switches. You simply grasp the PVS-14 one-handed, pull back, move it in-position, release, and you're good-to-go.

\$189.00

\*optic not included.

## IR HUNTER Mark II Thermal Scope 1.5x19mm 640x480 resolution / 60Hz

Designed and built by a team of shooters that has been delivering great thermal sights for 20 years. No matter the weather, day or night, the IR HUNTER thermal sight puts you on target at a highly competitive price.

\$5495.00

# Long Range Gear

## LaRue SPOTR LT666x06-ADP Tripod Adapter Mount QD

Allows precision shooting while standing or on uneven terrain.

The quick-disconnect LT666 Adapter is the interface used in the LT666 SPOTR observation telescope system. It is also ideal for use with picatinny-rail equipped rifles. CNC-machined from bar-stock aluminum, it features a single adjustable QD lever. Comes complete with 3/8" wrench and instructions.

NOTE: The LT666 Adapter only works with the Manfrotto 322RC2 Ball Head.

\$85.00

## SPOTR Manfrotto Tripod (055CXPRO3)

The ultra light tripod specifically designed for extreme outdoor assignments.

The legs and the column are made of 100% carbon fiber combined with magnesium die-casting quick action lever locking collars. Each leg can be independently set at **four different angle positions**.

This professional tripod provides great rigidity and lightness, combined with the best professional features such as the center column system which allows the center column to rotate over to 90 degrees (parallel to the ground). The top plate integrates a leveling bubble. Works perfectly with the Manfrotto 322RC2 Heavy Duty Grip Ball Head to hold SPOTR scope system, or as a base for your rifle platform when combined with LT666 mount.

\$519.99

## LaRue SPOTR Manfrotto Ball Head w/ LT666ADP

The 322RC2 is designed to interface perfectly with the Manfrotto Tripod 055CXPRO3 Tripod.

Combined with the LT666-ADP, the 322RC2 allows you to rotate and lock your rifle in any shooting position, and even let it stand free. The quick-disconnect LT666 Adapter is the interface used in the LT666 SPOTR observation telescope system. CNC-machined from bar-stock aluminum, it features a single adjustable QD lever.

NOTE: The LT666 Adapter only works with the Manfrotto 322RC2 Ball Head. \$249.95

# Kestrel

## Kestrel Elite Weather Meter with Applied Ballistics & LiNK

The Kestrel 5700 Elite Weather Meter with Applied Ballistics updates the Kestrel 4500 with:

- Bluetooth LINK works with PC/Mac via Dongle.
- Bluetooth LINK to Smartphones / Mobile / Android / IOS.
- Takes 1 AA battery (instead of 2 AAA).
- Battery door is in the back, sealed away from the motherboard, should your battery leak.
- Improved high resolution screen.
- Intuitive screen navigation.
- Scratch and break-resistant window.
- Options of Red (NV - Night Vision) & White backlights.
- Slightly bigger, but fits the same cases.
- Roughly 10,000 data points.
- Employs the Applied Ballistics bullet library, custom drag models, an exact measurement of your bullet's drag profile plus corrections for Aerodynamic Jump, Spin Drift, Coriolis, and Drop Scale Factoring to achieve accurate extended long-range shots.

- Customizable Range Card, expanded Ballistics Data Table, stores up to 16 gun and bullet profiles.
- Select either G1 or G7 ballistic coefficients.
- Get ballistic coefficient data for more than 225 long range bullets.
- Measure up to 15 environmental parameters at your fingertips.
- "Train" the software to match your specific rifle based on observed impacts at long range.

\$699.00

OD Green or Tan

## The POD

## Convert your Magpul CTR into a precision-rifle stock

Originally designed for the OBR, the LaRue POD (Prone Optimization Device) adds a 1.75" section of rail to the bottom of a Magpul CTR.

This creates the perfect platform for adding our **FUG**, which levels the rifle when shooting prone. The section of rail to the bottom also gives additional traction into bench rest bags, when not using an extension.

\*Designed to work on the Magpul CTR and MOE Stocks only - will not work with RAT Stock.

\$96.00

## Jonathon Blank: No Summer Soldier or Sunshine Patriot.

By Tom Beckstrand \*reprinted with permission  
Sniper, Issue II, March 29 2012

Combat comes in lots of flavors. For the majority of our troops deployed overseas, "combat" will consist of spending their deployment on a large military base performing support functions or pulling guard duty along the base's perimeter. "Combat" is mostly boring.

A small percentage of our troops will bear the assignment of closing with and destroying our nation's enemies on the field of battle through fire and maneuver. These are the soldiers who incur the majority of the risks and make the majority of the sacrifices. Rarely are they the ones beating their chests about where they've been or what they've done.

I had the opportunity to get to know one of the sniper community's most admirable members

*"...Marines don't leave one another behind—and that's not just a metaphoric phrase. We can endure that—we want to endure that—and we will not forget you."  
-Gunnery Sgt. Andrew Perryman*

Everyone on the hunt spent the days scouring the mountains for elk and the nights gathered in an old weather-beaten cabin, eating chow and telling lies. Over the course of our time in camp, I developed a profound respect for Jonathon, not only for the sacrifice he'd made, but also for the man he is and how he's handling his loss.

Jonathon joined the Marine Corps when he was 18. He volunteered for the Basic Reconnaissance Course (BRC) and Scout Sniper Basic Course (SSBC) at the first opportunity. BRC and SSBC are two of the three hardest schools the Marine Corps runs; Jonathon completed both.

As his enlistment came to an end, he volunteered to extend his term so that he could deploy with his teammates to Afghanistan. "I couldn't go through all of this training with them and then leave when it came time to deploy," he said.

this year. I wanted to take a moment to tell our readers about him. I met Jonathon Blank on an elk hunt sponsored by LaRue Tactical last October. Jonathon lost both legs in the Helmand Province, Afghanistan, during a battle with the Taliban. His unit came under intense fire and sought cover in a nearby compound. The Marines knew that many of the compounds were booby-trapped and were being as careful as the situation allowed. Jonathon stepped on an IED buried in the floor. The blast knocked him unconscious.

It is a miracle that Jonathon's teammates were able to keep him alive. But Jonathon survived and spent the next year in a hospital recovering before I met him in the mountains of northwestern Colorado.

"What if they needed me?"

Some of us volunteered for combat because we wanted to find out what it was like, how we would handle it. This is adventuresome and somewhat selfish, but it's still admirable. Jonathon went because he was worried that he wouldn't be there for his friends when they needed him. There is no purer form of service.

Like combat, soldiers and Marines also come in lots of different flavors. Jonathon is the kind of Marine who, even after losing his legs, is still driven. Instead of withdrawing from those who care about him and focusing on what he's lost, he puts his heart and soul into his rehab and occasionally goes elk hunting. It's easy to perform when life is being generous; if you want to know what a person's true nature is, watch how he handles a severe crisis. The way Jonathon is handling his crisis is a lesson for us all.

Jonathon's service gives him the status among those select few who chose to earn their position within the ranks of the elite and succeeded. Twice. Along the way, he experienced the suspense of a predawn raid on an enemy encampment and the thrill that accompanies the sound of gunfire in the dark, visited foreign lands, defended the weak and became part of a family of warriors that will always respect him and to which he will always belong.

Jonathon's service also required him to place a substantial sacrifice on the altar of freedom. But with that sacrifice and his determination to keep on living, he has earned the respect and admiration of a brotherhood of men who may

never fully understand the scope of what he lost, but admire and envy him for his strength and perseverance.

Serving in combat exacts a heavy toll. Along the way we bury teammates, some of us lose limbs and some of us die. Those who survive know what it was like to stand in the company of brave and talented men and know that their place is among them. Forever.

-Tom Beckstrand

# Harris Bipods

Harris bipods are quick detachable, and clamp to the sling swivel stud found in most rifles. We have adapters for those without studs.

**Series "M":** Legs eject by spring action. Height settings in 1" increments.

**Series "S":** Adds side to side tilt for instant leveling on uneven ground. Hinged base has tension adjustment and buffer springs for a rock-solid base. Available for ALL models except the "H."

From \$159.95

## Harris Combo Size Comparison

# Magpul Bipods

## LT271 QD Mount Combo

Lightweight Mil-spec hard anodized 6061 T-6 aluminum and injection-molded polymer bipod brings innovation in ergonomics, functionality, strength and value together. An aesthetically pleasing, low-profile design conceals its mechanisms and hardware, smoothly brushing off snags and bumps. Optimized for rapid one-handed adjustment....

\$155.95

## or... M-LOK

Legs extend a full four inches, from 6.3" to 10.3" with seven half-inch spaced locking detents. 50° of total tilt and 40° of total pan, Exclusive ability to lock pan at 0° while maintaining full tilt functionality. Just over 11 oz.

\$104.95

[www.LaRue.com](http://www.LaRue.com)

# Atlas Bipods

## PSR Atlas Bipod BT46-NC and LT271 QD Mount Combo

The latest generation of the popular Atlas Bipod provides rock solid support while weighing **less than 11 ounces**.

- Stainless steel springs & fasteners
- 15 degrees +/- of preloaded PAN
- 15 degrees +/- of preloaded CANT
- Estimated range of elevation is 5-9" standard
- 5 Leg positions 45 degree position forwards or backwards
- Novel 45 degree Leg position
- Heat Treated Stainless Steel Leg components

The **LT271** provides QD functionality to Atlas Bipods (No Clamp models) and the DBAL series of lasers. It replaces the original mount in minutes.

\$319.95

## MagnetoSpeed V3 Chronograph

The **MagnetoSpeed** is a barrel-mounted, ballistic chronograph that has brought modern convenience to the often tiresome task of measuring bullet velocities. The MagnetoSpeed chronographs use **ground breaking electromagnetic sensors**, instead of problematic optical sensors, to eliminate common chronograph problems. MagnetoSpeed chronographs are swift to set up, accurate, **impervious to light conditions, do not blow over in high winds and easily fit in a range bag**. The display unit stores up to 99 shots per string, calculates useful velocity statistics and saves the data in spreadsheet format to a micro SD card.

- Improved display
- A three-button menu system
- Battery options are; (1) 9-Volt or (2) CR123s
- Easy no-tools access battery compartment
- Improved shooting modes, with the ability to now operate with air guns
- Downloadable firmware updates
- Advanced data logging and troubleshooting capabilities
- More compact and rugged display housing
- Rapid-fire mode with rate-of-fire
- Bayonet strap ruggedized with metal buckle and triad thumb nut
- Added dual/redundant data connection points

\$380.00

[www.LaRue.com](http://www.LaRue.com)

E-Lander magazines feature a **6.5 Grendel specific design**, heat-treated steel body, durable body coating, reinforced floor plate tags, steel floor plate with integral locking plate, fully-deburred feed lips, and state-of-the-art, anti-tilt follower. Precision manufacturing produces consistency from one magazine to the next. **Available in capacities of 25, 17, or 10 rounds.**

\$18.95

# 6.5 Grendel FDE

Hi, this is Mark LaRue. You may recall back in 2008 I killed a nice Colorado bull elk at 405 yards, in a howling wind, with one shot from a 6.5 Grendel. I may hold the world distance record for the 6.5G bagging an elk.

LaRue IPO - Initial Precision Offering --- Offered Immediately.

We are wrapping up a small-run of our new gorgeous 6.5 Grendel rifles adorned in Flat Dark Earth and you can place your order right now.

Don't hesitate if you want one and be advised the 125 FDE 7.62 rifles we offered on Jan. 1st, 2016 sold out in four minutes flat.

Our recent run of 375 FDE 7.62 rifles crashed the website. It took nearly an hour to recover, so the run offering was delayed a bit and took just under 2 hours (but it was 3 times as many). Anyhow, get after it if you want one.

Now, to these 6.5 Grendel rifles ... these are a modified version of our Stealth 2.0 chassis, in Flat Dark Earth. Each comes with a matching FDE LT-104 30mm scope mount. The ultra-precision barrel is a stylish medium weight, 1-in-8" twist 18" long, SAAMI-chambered 6.5 Grendel. Our in-house barrel shop went with a 5/8-24 thread on the end to accommodate more of the open market adapters. We are shipping the rifle with what we consider to be the best brake on the market - ours - our TranQuilo brake that fits our TranQuilo suppressors. The base rifle is well-balanced and fairly light, coming in at a weight of 7 lbs. 13.2 oz.

I've told our guys and gals to toss in a free barrel wrench and a couple boxes of free shells (ha, "shells", that's my grandpa talking). One box is a Hornady factory load, the other is a custom precision load. You can try both out and buy more from us later if you so desire. Moreover, since this is "THE YEAR OF THE GRENDL", gun stores all over have all sorts of great 6.5 Grendel ammo to choose from ... it's everywhere.

There's one more thing - like the last run of rifles, we lined up a scope that's perfect for it, a Burris MTAC 1.5-6, with an illuminated BDC style reticle. Same style scope/reticle I whacked that bull elk with back in '08. If you take the scope option, we will mount it in the rings and sight it in ... and don't hold me to it, but I will likely shoot you a group to confirm zero.

I probably left some highlights out, but as folks that buy our rifles know, no quality stone has been left unturned.

We're hellbent on helping you hit what you're aiming at. Enjoy, and thanks for your continued business.

*Mark LaRue*

\$1999.00

[www.LaRue.com](http://www.LaRue.com)

# OBR 7.62 or 5.56

LaRue accuracy is known world-wide. **No rifle leaves our facility unless it obtains accuracy of less than 1 MOA (1.047") at 100 Yards**, and proves it in our 100-yard tunnel. Each rifle ships with a copy of its own 3-round group.

**W**ide range of barrel lengths, muzzle brakes and handguard accessories fit the OBR to your needs.

**L**ow profile gas block with Port Selector Technology for optimum function when suppressed.

**F**ree floating handguard isolates barrel, and barrel nut from interference, for accuracy and to prevent heat transfer.

**B**olt and Bolt Carrier are hand-polished hard-chrome, with staked, zero-leak carrier key.

**A**-PEG™ grip for the ultimate in control.

**B**UIS drop slot provides clearance for optics.

**T**he 7.62 comes with A2 Stock, in black, (shown).

From \$2245.00

\*16" OBR shown with optional accessories.

**The rifle that started it all. The flagship. The legend. Tested in battle, proven in competition, now in your hands.**

LaRue's **OBR (Optimized Battle Rifle)** was built from the ground up, using a newly designed upper-receiver platform CNC-machined from billet, for optimum fit and consistency, and strengthened and stiffened in critical areas, translating into **maximum accuracy**.

**Target-grade free floating barrel** and barrel nut do not contact handguard at any point. Generous, **one-piece top rail** with detachable 3" MIL-STD-1913 side rails.

**Port Selector Technology (PST)** two-position gas selector. Go between suppressed, and unsuppressed at the flip of a switch.

**XTRAXN™** facilitates reliable extraction through a wide range of temperature / chamber pressure extremes.

**7.62 features built-in 20 MOA rise** to increase range of optics. Heavy contour, 1:10 twist barrels in 16.1", 18" & 20" threaded in 5/8 x 24.

**5.56 provides 10 MOA rise**, in 12", 16.1", 18" & 20" barrels, with a 1:8 twist rate. Threaded in 1/2 x 28.

Base Model comes with A2 stock, LaRue medium A-PEG™ grip, A2 flash hider, two LaRue-made 20-round magazines (other muzzle devices available at additional cost). **RAT™ Stock standard on 12", 16", and 18" 5.56 models.**

**"The Free World needs a 7.62 gas gun that is accurate and reliable." -Mark LaRue**

[www.LaRue.com](http://www.LaRue.com)

# PredatAR 5.56 or 7.62

The **PredatAR** is designed for those searching for a **lightweight**, ultra-reliable and accurate **7.62 or 5.56 mm** NATO rifle for home-defense, competition-shooting or hunting. The PredatAR takes the highly accurate OBR 5.56 "Lite" design, and **lightens it in every possible way with the least possible impact to the accuracy** that the standard OBR is known for. By contouring the barrel, skeletonizing the handguard, lowering and simplifying the upper rail, and utilizing a low-profile gas block, we were able to **reduce roughly 1 pound from the standard OBR 5.56 and OBR 7.62 rifles.**

**L**ightweight 16" or 18" Barrel.

**E**xtended rail for versatile mounting of lights, optics, bipods and accessories.

**P**atented handguard mount isolates barrel from pressure, keeps heat away from hand.

**X**TRAXN™ is a proprietary chamber feature added to facilitate reliable extraction through a wide range of temperature and chamber pressures.

**H**ard-chromed, hand-polished bolt carrier.

**A**-PEG™ Grip improves control.

**R**AT™ Stock 6 position adjustability and storage for cleaning rod.

From \$1807.00

\*Iron Sights not included.

Barrels are **16" or 18" lightweight-profiled** with 1:8 rifling for 5.56mm and 1/2 x 28 muzzle threading. The 7.62 gets 1:10 rifling and 5/8 x 24 threads. Both ship with A2 flash hider.

Handguards on the PredatAR extend to **14.75"**, to suit a larger range of shooting styles. The **zero-MOA upper rail** provides ample room for weapon-mounted NV, day/night combinations. Both upper and lower are CNC-machined from billet aluminum for the optimum fit and consistency. Each rifle ships with one, 3" long, MIL-STD-1913 detachable rail section.

Both models come with 6-position **LaRue RAT™ Stock** and LaRue medium **A-PEG™Grip**. Bolt carriers are hand-polished hard-chrome with staked carrier keys, and Texas-Spec bolt assemblies. Includes 1 Aluminum Magazine, 1 Rail Strip, and A2 Flash Hider.

[www.LaRue.com](http://www.LaRue.com)

# PredatOBR 5.56, 7.62, .260, 6.5 CM

The most remarkable feature of the PredatOBR is its ability to be completely "broken down" and stored compactly.

Open the locking, stainless steel levers on each side of the handguard, and the **handguard slides off of the upper assembly in seconds**. The Target Contour barrel can then easily be removed, retaining the gas tube, gas block and muzzle device. Reassembled correctly, the **point of impact (POI) will be within 0.0 to 0.5 MOA** of the original.

Includes a Port Selector Technology™ (PST) gas block for optimum function when using a sound suppressor.

Zero-MOA upper rail provides plenty of room for night-vision day/night combinations.

Handguard bolts directly to the proprietary upper receiver, creating a true "free-float" barrel.

**M**BT-2S (Meticulously Built Trigger), a 2-stage innovation that gives you target precision with battle-tough engagement.

**R**AT™ Stock - 6 position adjustability with storage for a cleaning rod. Height is optimized for a perfect cheek weld.

From \$2245.00

The PredatOBR gives you the accuracy-enhancing features of the OBR on a lightened receiver with the capability of **compact, covert storage and travel**.

Rail sections provide a robust, lightweight mounting space for aiming lasers, illumination and bipods. Three included 3-inch MIL-STD-1913 rail sections can be positioned anywhere along the handguard, using the supplied (Torx® T-15 wrench). Reinforced, threaded **stainless-steel hard-points are placed along the entire length** of the handguard at the 3, 6, and 9 o'clock positions.

Wrapped in the optional Rollup Bag this target-grade battle rifle fits easily into our 20" L x 8.9" W x 9.7" D Toolbox.

## LaRue TranQuilo™ Sound Suppressor M308

The **LaRue TranQuilo** was designed and engineered for the LaRue 7.62x51 family of rifles, but it's right at-home on any precision .308 with a 5/8-24 threaded muzzle (1/2-28 threaded adapters also available). The TranQuilo is **100% CNC machined from stainless steels**. Its design reduces sound to hearing-safe levels and flash signature to almost zero. CNC machining of all components results in **near zero point-of-impact shift** when comparing on/off repeatability.

The TranQuilo's **reduced-blowback** is what sets it apart. The design approach implements what LaRue calls "SOT" (Safer Operator Technology). With mitigation of gas blow-back in mind, LEPE (Lower Ejection Port Emissions) **reduces dangerous materials and contaminants** that typically encounter the user's face. LEPE is an internal design that allows a percentage of pressure

to bypass the main flow-path, resulting in extremely **low gas blowback and soft recoil** with the benefit of **optimum noise and flash reduction**.

All components are manufactured from a combination of **17-4 PH Stainless Steel and Incoloy A-286**, 17-4 PH (Precipitation Hardening) and are precisely engineered to fit together solidly and perfectly, with **no welds** to fail, or dimensionally migrate as heat builds up.

To ensure the suppressor remains locked when attached, a **captive locking-ring** securely grips the suppressor to the adapter. Knurled bands provide structural robustness and add grip for installation and removal. The open, angled, four-prong tip reduces the small residual muzzle flash.

The Muzzle-Brake Adapter is also precision-machined from 17-4 PH Stainless Steel. Even though the TranQuilo was designed as a .308 suppressor, it also works well on .223 rifles. Adapters are available in **both 5/8-24 and 1/2-28 threads**. The Adapter's patented **dual-shouldered design** seats the suppressor in **perfect alignment to the bore**, and eliminates gas from escaping to the rear of the suppressor, keeping attachment threads clean and free of carbon. The TranQuilo Adapter comes with a theta shim kit.

Weight: 23 oz.  
Length: 8"  
Diameter: 1.50-1.75"  
Finish: 17-4 PH Stainless Steel  
Adapter: LaRue Muzzle Brake, SS 17-4 PH, 5/8-24 thread and 1/2-28 threads.

\$699.00

# Case Solved

## LaRue Covert Rifle Case, MkII

We've taken the low signature, versatile Covert Case to a whole new level.

Based on feedback from our customers, we decided to upgrade the MKII Covert Case with a variety of enhancements. We've made it an inch and a half wider, and an inch deeper. These dimensions may sound small, but they *provide the needed room to easily add longer barrel-length uppers* (like 18") and also position uppers vertically (to save room). We replaced the mesh pockets with a 10" x 7" Velcro loop panel and a 9" x 7" pocket. The loop panel provides a base for a variety of hook-backed accessories. The pocket has a YKK zipper and 5 rows of MOLLE Web. The *movable barriers now have hinge-points for easy positioning and customization*. Velcro on the hinge-points allows users to branch off additional smaller barriers in order to make compartments. Made in Texas, USA. Overall construction is of abrasion-resistant Cordura nylon, the case has *rigid, densely, padded walls* which protect your valuable contents without taking up space. Generous use of hook and loop surfaces allow as many configurations as you can imagine. Exterior 27.5" x 11" x 4.5" (the old version was 26" x 12" x 3.5")

In: Black, Blue, Charcoal, Coyote Brown, Foliage, Navy, Ranger Green, Red.

\$194.95

## Versatile, Covert, Convertible

[www.LaRue.com](http://www.LaRue.com)

## LaRue Rifle Bag

The perfect ruggedized case for your Tactical Rifle

Designed to **hold up to 20" barreled AR's with collapsible stocks**. Overbuilt for a lifetime of hard use, this padded case is ideal for your favorite rifles or even beat-up trunk guns.

### Exterior:

42" x 12" x 3.5" (excluding mag pouches). Heavy Cordura shell with a pair of 2" wide web carrying handles.

A 21" x 7" pocket keeps paperwork within reach. **5 magazine pouches** on the front are designed for either 5.56 or 7.62 mags. Each measures 6" x 3" x 1.5". Each mag pouch flap is adjustable with a strap/QD buckle, to accommodate contents up to 8" long (USGI Mags with Ranger Plates fit perfectly).

On the back are **two padded adjustable shoulder straps**. Each strap adjusts from 16" to 33". A 5.5" x 4.5" **YKK-zippered clear pocket** is great for ID, range cards, etc. A D-Ring is also added at the end of the bag, as an additional hard-point.

### Interior:

Opening the heavy YKK zipper reveals a padded inner wall that acts as a fly to keep contents from rubbing against zipper teeth, and also provides protection from the elements. Contents are protected by **1" thick foam walls**, sandwiched between Cordura.

The **interior dimensions are 41" x 11" x 1.5"**, easily accommodating most rifles. Two 14" x 2" hook and loop straps help keep contents secure. A 14-point 2" lash-down web panel allows the user to position the straps where they're needed most. A **removable 14" x 11" padded panel** provides added protection.

Made in USA Colors: OD Green, Black, Tan

\$159.95

## Accuracy First Shooting Rest Bag

Stability and proper position is very important in the world of precision shooting. This little "bean bag" is the perfect size for the precision shooter. It can be formed into a variety of shapes and heights to accommodate the proper shooting position on a variety of surfaces, especially uneven ground. Measures 8" x 5" x 2" and is patterned in MultiCam, embroidered with the "Accuracy 1st" logo.

\$29.95

## Armageddon Gear X-Wing Enhanced Rear Bag

Built with rugged Cordura Nylon with QD swivel mount.

Strap with Velcro can attach to rifle stock, forend, or wherever needed. The X-shaped bag provides a secure resting place for your riflestock, regardless of orientation. Proudly made in the USA, with lifetime warranty!

Colors:  
Coyote Brown or Black

- Velcro straps that allow the freedom to convert the MOAB into a shooting mat.
- 5 Magazine pouches that will hold (2) 5.56 30 round magazines or (1) 7.62 20 round magazine.
- 1 extra large pouch for convenient storage of your Harris Bi-pod.
- The MOAB is completely padded with closed cell foam to ensure that your valuable firearms and accessories are well protected.
- MOLLE strips for added accessories such as your new Kestrel Weather Meter, Ballistic Calculator, or detachable Suppressor.
- Internal pocket for storage.
- Adjustable Velcro/ MOLLE strips to secure your rifle.
- Fully adjustable shoulder straps for easy carry.
- Designed specifically to fit inside the 1750 case. \$489.90

**LaRue Tactical Improved Discreet Soft Case**

Fits AR-type rifles with up to 16" barrel (with collapsible stocks). Larger rifles can be broken down and secured to MOLLE strips. Removable padded separator. Five integral 20 or 30-round AR mag pockets. Zippered 8 1/2" x 7" pocket with MOLLE webbing. Zippered 5 1/2" x 7" widowed pocket for papers.

Dual-zippered closure, built-in handles with Velcro roll-over flap. 2"-wide adjustable shoulder strap extends from flush to 48".

In Black or Desert Tan.

\$184.95

**Storm iM3100 Hard Case/ LaRue Soft Case Combo**

All the advantages of a hard and soft case at a great discounted price. Our Improved Discreet Case is lighter, easier to carry, and compact to store when empty.

The Storm iM3100 hard case offers shock and crush protection, plus the ability to secure with locks when needed. *LaRue Improved Discreet Case fits perfectly into the Storm iM3100.*

**Interior:**

36.50" x 14.00" x 6.00" (92.7 x 35.5 x 15.2 cm)

\$354.95

## TG - FAST

### Free-standing Agile Steel Target

The LaRue FAST is a lightweight and portable reactionary target that can be setup in minutes. The FAST uses 4" x 4" posts, available at most lumber dealers. Precisely manufactured from high quality materials and designed to survive the toughest environments and roughest treatment.

**Free-Standing Non Powered** Easy to setup and position, needs no batteries or power.

**Man Portable** 39 lbs total weight. Minor assembly required.

**Battle Tough** 3/8" thick 500 Brinell target. Suitable for .223s and .308s. Excellent for shotgun and handgun training too! Targets are weather-proof, leave it out year round.

#### FAST Assembly

Free-standing Agile Steel Target. Includes Target, Base Plate, Spall Plate, and retaining Pins. (Does not include the 4" x 4" post, Post Guard or Post base).

#### Post Guard

This optional armor plate slides into the base assembly, hanging down in front of the 4" x 4", offering protection from impacts below the target.

#### Post Base

This optional part holds a 4" x 4" post vertically, anywhere you want to put a FAST Target.

\$480.00 Complete  
Parts available separately

## LaRue Tactical Sniper Target -TG1

LaRue Targets are made of the highest quality materials and are produced on computer numerically controlled (CNC) machinery that gives consistent high quality.

The overall dimensions are 28 inches high, 32 inches wide and is made of 3/8 inch steel plate that is hardened to 500 Brinell. Silhouette plates are rated to accommodate 7.62mm NATO, but have been shot them with .300 Winchester Magnum at ranges as close as 200 meters without ill effect.

LaRue targets are battery powered and will cycle through approximately 1,800 down and up cycles before requiring a recharge. After being hit, the target returns to the upright position and automatically shuts off until the silhouette is again hit and knocked down. This is the primary reason for the systems long battery life. It also precludes having to turn the targets off and on, although there is a master on/off switch.

The targets are weatherproof and can be left out without damage. Users have reported leaving LaRue targets exposed to the weather over a year's time without affecting their operation. LaRue Tactical stands behind the quality of its targets and will repair or replace any target that is found to be defective.

\$2250.00

## LaRue Rifle Owner Armorer's Class 53

This isn't a typical armorer's class. The LaRue Rifle Owner Armorer's Class is based on the same highly-detailed and thorough class we've given to the government for years. In this two-day detail intensive class, you will learn everything you need to know from essential tools, to function-checking. You will leave with the knowledge and skill to keep your LaRue rifle running at its best.

An in-depth take home manual and tool kit for each student will be provided for the class, so all you need to do is bring your LaRue rifle (of any type) and be on time. You will be disassembling your rifle down to the smallest components, so prepare to learn more about your LaRue firearm than you ever have.

Each class will be limited to 12 students, so that instruction can be most effective. We are expecting the schedule to fill up quickly so get on the list as soon as you can.

Some of the topics covered will be:  
Nomenclature and Function of all Major Components

Armorer's Tools & Equipment  
Disassembly of Major Components  
Assembly, Testing and Headspacing  
Cycle of Operation  
Malfunctions (Diagnosis and Repair)

#### INSTRUCTOR:

We are extremely proud to have **Robert Gee** as our Instructor.

Rob has over 35 years of experience in the field of gunsmithing and Armorer training. After graduating from the Pennsylvania Gunsmith School he owned a successful gunsmithing business for 8 years.

He then spent the next 19 years as the Armory Operations Program Manager at the Department of Energy National Training Center, where he was responsible for the training, certification and recertification of all DOE site Armorer's.

Utilizing this vast experience, he has instructed and/or written the Armorer Programs for companies such as Bushmaster, DPMS, LaRue Tactical, Long Mountain Outfitters and Sig Sauer after leaving the NTC. Several firearms manufacturers have consulted with him on various manufacturing issues as well as product evaluation.

Price Varies

## LaRue Tactical Shirts

Made from comfortable Gildan Activewear

100% Cotton, with the LaRue Tactical Texas Logo on the left chest and "God Bless Our Troops...Especially Our Snipers!" on the back. And yes, we do have those in long-sleeved for the same price.

\$19.95

LaRue Tactical LONG-SLEEVE T-Shirts

## LaRue Dillo Dust Shirt

Show off your LaRue pride - in a very cool way. The famous Dillo Dust label is boldly silk-screened across the back for everyone at the next BBQ to see.

BACK

\$24.95

## LaRue Tactical Fine Jersey T-Shirt

We've added these for folks that desire a more comfortable shirt. The American Apparel 2001 is the softest, smoothest, best-looking short sleeve tee shirt available anywhere...and made in the USA!

LaRue Tactical Texas Logo on the left chest and "God Bless Our Troops...Especially Our Snipers!" on the back.

© 2010 LaRue Tactical

- Fine Jersey (100% Cotton) construction
  - Durable rib neckband
- Colors: Olive, Slate, Black

NOTE: American Apparel shirts tend to run on the small size. We recommend ordering a size larger than normal.

\$24.95

## Dillo Grenade Shirts

100% Cotton, preshrunk shirts with the popular "Dillo Grenade" design. Red Shirt / Black print  
Chestnut Shirt / Khaki print  
Charcoal Shirt / Gray print  
Sizes available: SM, M, L, XL, 2XL

\$19.95

## Show Some Pride!

We've improved our popular ball cap. We had the button taken off the top and the brass grommets replaced with sewn-in reinforcements. Now, they are much more comfortable when wearing hearing wrap-over protection.

Each hat features a recessed opening at the right base of the brim that allows users to insert flashlights with reverse retention clips (like the SureFire Backup). This allows the user to keep the light on the top of the brim. Two sewn-in utility loops help to keep eyewear from sliding off the brim and also out from under earpro. The Velcro backstrap adjusts to almost any size head.

Colors: Olive Drab, Khaki, Black, UDE

\$19.95

## LaRue-Embroidered Outdoor Research Wind Pro Hat

The "LaRue" Wind Pro is custom embroidered with the world-famous LaRue 'Dillo. This warm, close-fitting hat is an excellent choice for that cold day at the range...or for anyone heading out in cold conditions. It's made of a hard-faced fleece that is wind-resistant, water-repellent, and is highly breathable.

You are gonna LOVE this hat. \$28.95

Color: Black, Size: L/XL

## LaRue MicroFiber Game Guard Shirt

As GameGuard's best-selling style, the MicroFiber is a must-have for your daily adventures. Keeping it simple with your favorite features- like a vented back panel with mesh lining, fast-drying performance fabric, UPF 30+ protection and a tagless collar. Comes with the LaRue Tactical Texas Logo on the left chest.

Short Sleeve \$59.95  
Long Sleeve \$79.95

## LaRue Tactical Hooded Sweatshirts

At long last, the hoodies are back for LaRue fans. Perfect for those cold mornings at the range. These 9 oz hooded sweatshirts are meticulously embroidered with LaRue logo on the front and the back.

Sizes: SM-4XL \$44.95  
Material: 50/50 cotton/poly fleece  
Colors: Black, Forest, Red & Navy

## Applied Ballistics Combo

**Applied Ballistics for Long Range Shooting 3rd Edition** by **Bryan Litz** - This book offers an original contribution to the long range shooting sports: *experimentally measured Ballistic Coefficient (BC) data for over 175 long range bullets of all popular brands.* With truly accurate BC's, shooters can make very precise trajectory calculations.

### Putting Rounds on Target with Bryan Litz, 4-Disk DVD Set.

### Applied Ballistics Accuracy and Precision for Long Range Shooting

written in the same easy to understand language that made Applied Ballistics for Long Range Shooting such an enjoyable and effective book. Long range shooting can be very technical. However, author Bryan Litz, communicates these complex ideas in layman's terms, so most average shooters can master the subject with little difficulty.

### Kestrel Elite Weather Meter with Applied Ballistics & LiNK

**Bryan Litz** earned his Aerospace Engineering degree from Pennsylvania State University in 2002. For the next 6 years, he worked for the US Air Force on air-to-air missile design, modeling and simulation. In 2008, Bryan became the Chief Ballistician for Berger bullets. Bryan is also a very active and successful competitive shooter.

ALL 3 \$785.00

## Combative Fundamentals, An Unconventional Approach

*"The secret to winning is simple. Master the fundamentals and then execute them faster than your opponent.."*

-Jeff Gonzales.

The most comprehensive source of information for the pistol and carbine available today. Written by a U.S. Navy SEAL. Complete pistol and carbine information.

- Centered around adult learning.
- Utilizes lessons

- learned from combat and training. Full-sized 8.5 x 11, packed with 325 pages of information with nearly 50 pictures.

\$39.95

## M16/M4, Handbook

A quick reference training guide for all owners of M16/M4/AR15 rifles, by Mike Pannone.

Applies the author's more-than 20 years of shooting experience using the M16/M4 series weapons for sport, training and combat. This handbook compresses operation and

employment of the M16/M4 weapon system.

Covers: ballistics, malfunctions, maintenance, and sight/optics adjustment.

Coil bound to lay flat, its 4" x 6" compact size, fits easily in cargo pockets.

96 pages, with Color Photos / Diagrams

\$19.95

## STAY IN THE FIGHT!!

This book is intended to enhance your shooting skills and refine the tactical employment of your Combat Pistol. Military, Law Enforcement and Civilians alike will find a wealth of information and numerous tools for their Tactical Toolbox.

We also discuss the Training Mentality and Mindset that will help you not only survive your next gunfight but thrive.

*"My mission is to teach you aggressive techniques that will keep you operating on the offense; we will push you beyond your current capabilities. If you are willing to keep an open mind you will take away valuable Warrior skills that may be used the next time you step into the street."*

-SGM Kyle E. Lamb

\$40.99

## T.A.P.S.

### Tactical Application of Practical Shooting:

*Recognize the void in your tactical training*

This book will increase the confidence and efficiency of your shooting by providing training tips and courses of fire to help you significantly improve your marksmanship. Utilize his tips and techniques and reap the benefits as you shoot.

*-Author Patrick McNamara spent twenty-two years in the United States Army in a myriad of special operations units.*

\$17.95

## Applied Ballistics For Long Range Shooting 3rd Edition

Exterior ballistics is a very mature science. Unfortunately, most shooters have not been able to take full advantage of this field of knowledge because it has always been described in a highly technical language.

In this book, author, champion shooter and Ballistician **Bryan Litz** breaks down the complex science of accuracy into layman's terms that are easy to understand and apply. The objective of each subject matter is to present information to the reader which they can use to hit targets at long range.

### New for this Third Edition:

The traditional role of exterior ballistics has been to account for the variables related to bullet flight so that accurate fire solutions can be computed. Author Bryan Litz believes that ballistics has more to offer.

Weapon Employment Zone (WEZ) analysis is the calculation of hit percentages. The subject of WEZ analysis is explored and some enlightening topics are presented regarding the effects of environmental uncertainties on your hit percentage, as well as how the ballistic performance of your rifle and bullet affects hit percentage.

This edition also includes the latest version of the Applied Ballistics Point Mass Solver on CD. Combined with experimentally measured BC's, this program is capable of modeling extremely accurate trajectories as verified in Chapter 8.

\$49.95

## Accuracy 1st - Long Range Made Easy

### Volume 1

#### Disc 1

Join renowned precision shooting instructor **Todd Hodnett** and learn: How to best select the proper rifle platform, scope and bullet. How to zero. Guest **Bryan Litz** discusses ballistics.

#### Disc 2

Optimal shooting positioning. Proper recoil management. How to set up the rifle. Todd's Speed Wind formula.

### Volume 2

#### Disc 1

Hit the range with Todd to learn: Using the Applied Ballistics Kestrel, Bullet Diameter, Truing Ballistic Algorithms, Drag Scale Factoring (DFS), WEZ Finish with Hit Probability.

#### Disc 2

Todd shares the tricks of the trade: Wind Course, Whiz Wheel with Alice, Reticle Types. Concludes with a demonstration of the infamous One Mile Shot.

\$76.95

## Putting Rounds on Target -with Bryan Litz

Applied Ballistics Instructional **4-DVD Set** Champion shooter and Ballistician, **Bryan Litz** explains and demonstrates the science of external ballistics in long range shooting.

#### Disc 1:

Accuracy & Precision  
Tall Target Test  
Chronographs & Statistics  
Ballistic Coefficient  
Trajectory Terms

#### Disc 2:

Primary  
Elevation  
Influences

#### Wind

Secondary Effects  
Using Ballistics Solvers  
Short & Long Range Equipment

#### Disc 3:

308 Winchester  
284 Winchester  
338 Lapua Magnum  
Extended Range Shooting  
Equipment for Extended Range Shooting  
One Mile Shooting

#### Bonus Disc:

"Long Range Competition: It's Worth it."  
Documentary of long range bulls-eye shooting.

## Make Ready With Freddie Blish: Intro To Combat Optics

Many people like to run non-magnified dot optics on their carbines. There is also the trend to run them on pistols. Yet a good percentage of folks don't know the difference between the different brands of dot optics on the market or how to best utilize the optics within their given applications.

Freddie reviews optics from Aimpoint, EOTech, Trijicon, Vortex, and JP Enterprises. He reviews durability, reliability, trouble shooting, optic mounts, the downed optic drill, the occluded optic drill, mechanical offset, parallax and asymmetric position, reticle tracking, optics for handguns and shotguns, and zeroing at 100, 200, and 300 meters.

Freddie is a retired Lieutenant Colonel from the United States Marine Corps, where he served 24 years. As the Director of Military Business Development for Aimpoint, Inc, he developed an intensive training program on their use by the US Army Regional Training Center firearms instructors, US Army Mountain Warfare School, USAF Para-Rescue, and I Marine Expeditionary Force Advisory Training Teams.

\$29.99

## TReMoR 2 The Refined MIL Reticle

**Accuracy 1st Development Group, Inc.** puts to rest some of the common misconceptions about what it takes to be an accurate long range hunter or marksman with this instructional DVD.

Backed by the expertise of **Todd Hodnett**, and **Bryan Litz**, this DVD simplifies complex ballistics formulas into a fast and easy "second grade math" process that allows the operator to see the image in the glass, and engage it very quickly. A shooter who doesn't have countless hours of range time, and unlimited ammo can become proficient with their weapon system of choice, even without a dope book, or rangefinder.

\$29.95

## Training Tools

### TACOST Card Sets, by TRICON

If you're tired of just putting holes in paper, step up to the TACOST Card challenge!

These card sets were developed by **Jeff Gonzalez**. When it comes down to training, Jeff is as serious as it gets. A flip of each card provides you with an individual and unique challenge. These drills are categorized into 4 different groups (Marksmanship, Speed, Baseline and DryFire).

Each group has 13 exercises. Make your way through the entire deck and you will certainly sharpen your skills. The basic design is based on a standard 52-card playing deck. In fact, once training is done for the day, you can play whatever card game you choose. The deck includes a legend, basic instructions, and safety rules. Everything else is pretty much self-explanatory.

Available in either Pistol or Rifle.

\$19.99

[www.LaRue.com](http://www.LaRue.com)

## LaRue Tactical RISR™ / CTR Combo

Perfect for those who don't already own a CTR. It's a fact that *some AR's need a cheek riser to get proper cheek weld for raised scopes or rifles with raised rails.* It's another fact that standard AR charging handles require a lot of travel, making it impossible to charge a rifle without moving a collapsible stock all the way to the rear. The LaRue RISR solves these problems.

Made in Texas, USA, out of glass-reinforced polymer, the RISR is spring-loaded, and *travels to the rear as the charging handle is moved to the rear.* When the charging handle is released, the RISR snaps forward. *Designed to fit the excellent Magpul CTR butt stock without modification,* the RISR only takes a few minutes to install with a phillips-head screwdriver. Comes with a Mil-Spec Magpul CTR in your choice of Black, FDE, OD or Foliage \$74.95

## LaRue Tactical RAT Stock

With simplicity in mind, the LaRue RAT™ Stock was designed to be the ideal complement to the LaRue Tactical AR15 family of rifles. The unique 2-stage trigger mechanism allows shooters to *adjust the pull length of the stock while in a variety of shooting positions.* The CNC-machined

internals allow for smooth operation as trigger mechanism is pulled to the rear and released. The internals provide positive lockup on Mil-Spec receiver extension positions. The internal cavity is designed for a snug fit without the need for an additional locking mechanism.

slots provide ideal anchor points for two-point slings. A locking rear butt-plate slides open to expose compartments that hold cleaning kit components.

Ambidextrous 1/4" swivel sockets, and 1"

Colors: Black, FDE, OD, FOL, UDE, Pink, Blaze

\$39.00

\*extension tube not included

[www.LaRue.com](http://www.LaRue.com)

## LMT DMR556 Stock

DMR buttstock assembly for 5.56 rifle fits on mil spec carbine (extension tube NOT included) - SOPMOD cheek rest for comfort and a better shooting position - Adjustable by 45 positions in cheek well height and length of pull and two positions on the extension tube - SOPMOD rubber butt plate reduces felt recoil - Concealed rail for mono-pod attachment - 2 QD sling swivel sockets - Collapsed length 9.20"

\$289.00

## LMT SOPMOD Stock

The preferred stock of the US Special Ops Command. The LMT SOPMOD Stock features an excellent cheek weld for optimum shooting position. Included in the stock's frame, are two watertight storage compartments that hold batteries or other small items, like earplugs, etc.. The padded buttplate provides no-slip surface against chest rigs and body armor. Easily drops on to any Mil-Spec M-4 receiver extension tube (Will not fit on a commercial tube). \$199.00

## Magpul PRS GEN3 Precision-Adjustable Stock

The PRS GEN3 is a field precision stock for AR15/M16 and AR10/SR25 platforms, featuring tool-less length of pull and cheek piece height adjustment.

With solid adjustments for length of pull and cheek piece height via aluminum detent knobs, the PRS GEN3 (Precision Rifle/Sniper) stock provides a stable interface and is intended for semi-automatic sniper or varmint type rifles. Offering a nearly universal fit, it is optimized for rifle-length receiver extensions but will also mount to many mil-spec carbine and A5-length tubes\*. Includes a cant/height-adjustable rubber butt-pad and rotation-limiting QD sling swivel cups as well as M-LOK® slots on the bottom for rear monopod mounting.

\$242.20

[www.LaRue.com](http://www.LaRue.com)

## LaRue TranQuilo 7.62 Muzzle Brake/Adapter

The Muzzle-Brake Adapter is precision-machined from 17-4 PH Stainless Steel. Provides outstanding recoil reduction. Precisely located and sized ports reduce muzzle climb. Available in both 5/8-24 and 1/2-28 threads.

The Adapter's patented dual-shouldered design seats the suppressor in perfect alignment to the bore, and eliminates gas from escaping to the rear of the suppressor, keeping attachment threads clean and free of carbon.

The TranQuilo Adapter comes with a theta shim kit.

\$99.00

[www.LaRue.com](http://www.LaRue.com)

## SJC Titan Compensator, .223/.308 Black or Stainless

This brake keeps muzzle rise at an absolute minimum, and eliminates substantial muzzle blast associated with other brakes.

Designed and developed with USPSA Grand Master Eric Lund to provide a competitive advantage in 3-gun competition. It is legal for Limited, Tactical and Open Division rifles.

This compensator will reduce your muzzle rise, giving you better control of your rifle. Gas vectoring technology maximizes recoil reduction and minimizes torque and shot to shot recovery time. The design traps expanding gasses in the baffles and

increases dwell time for maximum efficiency possible, allowing faster follow up shots and transitions between targets.

For .308, 5/8 x 24 threaded barrel.  
For .223, 1/2 x 28 threaded barrel. - Blends smoothly into any .750" barrel.

- Comes with instructions and crush washer.

\$120.00 (+\$4 for black)

## SureFire WARCOMP 556-1/2-28 or 762-5/8-24 63

The revolutionary SureFire WARCOMP is the world's most shootable flash hider. Its patent-pending design provides three valuable functions:

It provides over 99% reduction in muzzle flash compared to a plain muzzle, which helps to conceal the shooter's location and preserve his dark-adapted vision.

It virtually eliminates muzzle rise, which enhances monitoring of target reaction and staying on target for faster follow-up shots.

It serves as a rock-solid mounting adapter for all SureFire SOCOM Series 5.56mm Fast-Attach® suppressors, including our SOCOM556-RC model, which placed first in the most extensive and rigorous suppressor

testing ever conducted by US Special Operations Command.

Precision machined from US Mill-certified heat-treated stainless steel bar stock — including high-precision single-point cut threads for optimum thread interface — the WARCOMP-556-1/2-28 features an Ionbond DLC coating to provide maximum protection under harsh environmental conditions and to facilitate cleaning even after extreme use.

When used in conjunction with a SureFire SOCOM Series Fast-Attach suppressor, the WARCOMP provides multiple bearing surfaces to ensure superior suppressor alignment and prevent any ringing of tines inside the suppressor. A rear labyrinth seal mitigates gas leaking from the back of a suppressor, minimizes potential carbon buildup in the indexing system, and facilitates suppressor removal after extended firing. Every SureFire WarComp is individually inspected for concentricity and alignment.

\$129.00

## Smith Enterprises G6-A2 Vortex Flash Eliminator

Based on the combat-proven Vortex® 5.56mm G6A1 system, the definitive-development of the patented Vortex® design now features a 40% increase in structural rigidity.

The alignment of exiting gases helps to improve overall accuracy.

The highest degree of flash suppression is gained using M-193, SS-109 (M855), and MK 262 service ammunition.

\$51.00

## PWS MOD 2 FSC SERIES 5.56 Flash Suppressing Compensator

The unique port design of the FSC Series yields muzzle control that meets or exceeds the performance of the best muzzle brakes on the market without the teeth-rattling overpressure indicative of other brakes and compensators.

\$94.95

[www.LaRue.com](http://www.LaRue.com)

## Federal Premium GMM

Long range isn't just a distance. It's a state of mind. A dedication to push further. And it's why Federal Premium® builds Gold Medal® rifle loads. The exclusive primer design provides the best sensitivity and most consistent ballistics in the industry.

The precision-built **Sierra® MatchKing®** bullet is shot to win more matches than any other rifle bullet, thanks to a uniform jacket that ensures consistent, long-range accuracy, and a sleek boat-tail that maximizes ballistic coefficient. It's the only choice for the world's most elite shooters.

**Gold Medal® Berger®** loads feature an advanced boat-tail bullet with a high ballistic coefficient to provide the flattest trajectories, less wind drift and surgical long-range accuracy. To get the most performance out of the bullet designs, these loads use Gold Medal match primers, Federal® brass and specially formulated propellant, and they adhere to Federal Premium's strictest specifications for accuracy, pressure and velocity.

20 Round Box

Available in:

- .223 Rem 77 Gr. SMK (Sierra MatchKing®)
- .223 Rem 69 Gr. SMK
- .308 175 Gr. SMK
- .308 168 Gr. SMK
- .224 Valkyrie 90 Gr. SMK
- 6.5 Creedmoor 130 Gr. Berger Hybrid BTHP
- 6.5 Grendel 130 Gr. Berger Hybrid BTHP

From \$20.00

## Applied Ballistics Munitions

### 308 Win 175gr Berger Match OTM Tactical

Applied Ballistics Munitions offers superior ammunition for shooters that require reliability, accuracy and consistency. Our ballisticians, Bryan Litz, uses scientific techniques to develop each cartridge using only the highest quality components. Rigorous testing is done to provide consistent velocities and trajectories from lot to lot, so that each shot is as good as the last. We work tirelessly to ensure that wherever your journey takes you; your ammo is Mission Ready™.

The Mission Ready™ line is built to outperform any other tactical round while being able to withstand even the harshest conditions. Whether you are shooting in the heat of the sun or the cold dead of night, each pull of the trigger will deliver the results you demand.

#### ATTENTION!

You must be 18 years or older to order ammunition. Ammo must ship UPS ground. Due to Department of Transportation regulations, we cannot accept returns on ammo. Please check local laws before ordering. By adding this item to cart you agree you are not prohibited by federal or state law from acquiring or possessing ammunition. You also verify that you do not intend to export this product, you are a legal U.S. resident, and you understand and agree to the Export Policy.

# Give Me One Good Reason...

By Robert Gee

When Mark LaRue asked me to write an Armorer Course for him, I asked if I could write the class I always wanted to take. Mark told me to write a class reflective of the product he produces. That was my green light to put together a class unlike anything else out there. A class where even I would say, "That was the best class I ever took."

You see, after 40 years in this business I have taken nearly every Armorer class available and have taught or written several of them. The majority were lacking in the areas I felt were important topics of discussion and many really teach nothing more than disassembly and reassembly. Manufacturers took on an attitude of "People don't need to know more than that" and the courses reflected what sometimes amounted to a lack of understanding on their part. It seemed that many classes were written and taught by a firearms instructor who may have carried the gun for a number of years but had little knowledge of how the thing he carried to defend his life actually worked. Technical questions asked by us students often went unanswered simply because the instructor had no idea what the answer was.

If you've ever attended one of LaRue's classes, you'll remember that I always say "We can train a monkey to take a gun apart and the internet is full of videos showing that is true." What I want students to take away from our class is the "Why's" of firearms. Understanding what makes guns work, particularly with the AR platform, is extremely important to your overall firearms experience.

We start off discussing tools, their use and what you truly need to work on a LaRue rifle. There are tools you must have, tools which are nice to have and tools that are luxuries making your life beautiful.

We do disassemble and reassemble as many times as the students feel necessary, but put a greater emphasis on things like Cycle of Operation, malfunctions and diagnosis. What happens when I pull the trigger and the gun goes "Bang"? We all know that Firing, Unlocking, Extracting, Ejecting, Cocking, Feeding, Chambering and Locking are the eight steps in making our guns fire and function, but do you know that there are literally dozens of steps within the eight steps in that cycle of operation happening in a fraction of a second and how each of those steps affect the next? Knowing the steps involved in the operation of a firearm is fascinating stuff. You'll walk away thinking of your rifle in a whole new light.

Discussing the math and physics involved in making a weapon fire, stay together under enormous levels of pressure, cycle precisely and the critical timing of these operations will give you new insight to the brilliance of our weapon designers. I sat down with industry friends who represent the best of gunsmiths, engineers, firearms historians and even a real live rocket scientist to help put together the best, no-nonsense information for this class.

A LaRue rifle is a true marvel of engineering and we'll show you how the complexities of the AR platform come together. LaRue rifles are extremely accurate and this class will tell you some of the ways we accomplish this. There are a few secrets here and there, but we'll let you know the processes that help rifles achieve the accuracy LaRue insists on in every rifle we build.

# ...to Take a LaRue Armorer's Class 67

Knowing what "Headspace" is and understanding how it affects accuracy is something we talk about in depth. What is it? How does it work? How does it affect bullet performance and how does headspace affect safety. Knowing this may help you in diagnosing a problem gun you may have living in your safe.

Malfunctions are unfortunately a part of every firearm, and the AR platform lends itself to some real head scratching problems. Many of these are caused by gas problems and the confusing "time under pressure" black magic we've heard spoken in hushed tones through the years. We talk about this in depth and discuss what LaRue has done to

eliminate some of these malfunctions. There is a lot of bad information circulating out there about gas port sizes, gas block design, gas tubes, carrier keys and gas rings. Do you know why it is important to keep an accurate rounds fired record? We'll help clear up some of the noise and get you on the right path.

Have you ever really looked at your fired brass and read what story it tells you about your rifle? There is a lot of good information there if you know what to look for and, more importantly, how to interpret what you see. Firing, Unlocking, Extraction and Ejection all show up on your brass case as well as headspace issues, chamber conditions, magazine or feed ramp issues. They are all there. We'll teach you what to look for.

Care and cleaning are a huge part of owning a firearm. What needs cleaning, where does dirt hide and where should I concentrate my efforts? Is there anything I am currently doing wrong? We'll talk about it and

give you some insight that may surprise you. Lubrication is a must, right? Where? How much? How often? What kind? What if I live in the Arctic or the tropics? Lubrication is different, we'll talk about why.

So...Give you one good reason to take a LaRue Armorer's Class? There is all the stuff I wrote above, or you can read what one student wrote in his critique "I've been around AR's for over thirty years, attended 5 different AR classes and I never realized how little I knew about the AR platform. I walked out of this class with a head overflowing with information I never knew existed."

If that testimony isn't enough, know that you'll get a really cool SWAG bag when you attend...

-Robert Gee, LaRue Armorer Instructor

# Backup Iron Sights

## TROY

### Troy Front and Rear Folding Battle Sight with Tritium Inserts Combo

The perfect backup rear sight for low-light conditions, Troy mounts are durable, heavy-duty, and designed to survive the toughest environments. Easily installed, the rear sight aperture installs at the exact same height as the factory sights. With no levers or springs to fumble with, deployment of the sight under-stress is easy. The robust stainless-steel

cross locking system ensures your sights will remain up and zeroed in the most extreme combat conditions. To fold, simply press the release-button located on the left side of the sight, and push down. All Troy Sights feature a zero-canting attachment system for use on all military and aftermarket receivers.

\$290.00

### Troy Offset Sight Set, Front and Round Rear

Durability and dead-on accuracy have made Troy Industries' Folding BattleSights the choice of Special Ops and tactical users worldwide. The TROY 45 Degree Folding

BattleSights fold compactly to both sides of the rifle.

With an **ambidextrous sight base**, TROY 45 Degree BattleSights work seamlessly with magnified optics. Easy to install and deploy, these sights position apertures at factory height. A stainless-steel cross-locking system ensures the sight remains upright and zeroed under extreme combat conditions.

All Troy Sights Have LaRue Logo Engraved.

*\*Note: Sight is designed to work on same plane rail systems only. Will not work with a railed gas block that is higher or lower than the receiver.*

\$239.00

## Troy Di-Optic Aperture

### Front & Rear Sight Combo

The **Troy DOA**, in a combo package.

The optically engineered apertures center your eyes instantly and effortlessly, providing a clearer target picture than with round apertures.

#### The Rear Sight:

These sights provide lightning fast target acquisition and are manufactured to exceed military specs. The rear sight features two settings, one for up to 300 meters and a second for up to 500 meters.

#### The Front Sight:

Exactly the same height as factory, with no levers or springs to fumble with, it deploys easily under-stress. The robust stainless-steel cross locking system ensures your sights will remain up and zeroed. To fold, press the release-button located on the left side of the sight, and push down. All Troy Sights feature a zero-canting attachment system for use on all military and aftermarket receivers. Made in USA.

*Note: Sight is designed to work on same plane rail systems only.*

\$199.00

### Dueck Defense Rapid Transition

**Sights (RTS)** provide shooters with the quickest possible transition

between longer- and closer-range

target acquisition, greatly

increasing efficiency and effectiveness in battle and competition. Designed

by Barry Dueck—Director of SureFire's Suppressor Division and a top

3-Gun shooter—these sights mount directly to a weapon's Picatinny

rail, offset from center by approximately 45°. Allows smooth, quick

transitions that could

mean the difference

between winning and

losing a competition, or more

importantly—a gunfight.

7075 aluminum, Mil-Spec hard anodized,

Standard-issue height, Ambidextrous,

Low-profile, ½ MOA adjustments

Rear – 3 ounces (85g) / Front – 1.5 ounces (44g)

\$238.00

## DUECK DEFENSE

# Slings & Carry

## OBR Sling Adapter

Designed to work with the threaded inserts on both 7.62 and 5.56 OBR handguards (including PredatOBR and PredatAR), this **lightweight, low-profile** accessory can be **attached anywhere on the handguard** where a threaded insert exists.

A steel insert provides durability and has inside-radius stops that **prevent the sling from rotating and twisting.**

\$39.95

## LaRue Tactical 1.25 Inch Swivel

Allows a robust push-button QD connection to any 1.25" swivel socket.

The same swivel as on our legendary sling... Hand-tested at LaRue, and made in the USA.

\$15.00

## Fortis - Rail Attachment Point (RAP)

Compact & robust, the RAP™ is perfect in size and function. Accepts Heavy Duty quick detachable sling swivels with limited rotation. Made of 6061 aluminum and hard coat anodized to a deep black finish. Attach your sling with minimal footprint on your rail.

\*\*\*Quick Detach Swivel Sold Separately\*\*\*

\$18.95

## LaRue Tactical Padded Sling

The quick-adjustable design allows you to carry the weapon at the ready, with the muzzle pointed downward. Because this sling holds the rifle close to the torso, fast transitions between rifle and pistol are possible simply by swinging the rifle to the small of the back or along the side. 1.25 Inch Quick Detach (QD) Swivels at each end, attach to any stock with a 1.25" QD socket. The forward-section of the sling has a sewn-in QD Swivel connected to a small side-release buckle, allowing the rifle to be quickly dismantled while wearing cumbersome chest gear and bulky helmets.

The sling can be shouldered off the right or left shoulder, depending on shooter's preference. Once slung, the length can be shortened to desired length by pulling on the strap. A cam locks the length in-place.. The lightweight aluminum and steel adjustment cam is the familiar ALICE strap adjustment cam used by the military for years. The 3" pull-cord makes releasing the cam easy, even with gloves on or in the dark.

Available in Tan and Foliage, each sling comes with instructions, ready to mount.

\$69.95

[www.LaRue.com](http://www.LaRue.com)

## GrovTec Padded Backpack Sling with QD Swivels

Easily carry your rifle comfortably all day, like a backpack.

The padded, tapered design emphasizes width at the load-carrying position to spread weight over a greater area. Stretch Web at the base of each pad *absorbs shock without the annoying rebound.* Integrated thumb loops allow for easy shift of weight. Non-skid, durable, long-wearing material holds just enough to keep the firearm in place without inhibiting your ability to quickly remove/shoulder your firearm. Includes premium sewn-in QD swivels.

\$39.95

## Armageddon Gear Carbine Sling

This adjustable sling has a full 6 inches of built-in The Armageddon Gear Carbine Sling gives the ultimate utility in *allowing the rifle to be ready for action without sling adjustment while being securely held against the body.*

Provides the ultimate in weapon stability by pulling the rifle

back into the shoulder creating a very stable shooting position.

Coyote Brown or Black  
Made in USA

\$44.95

## Q.D. 360 Push Button Swivel Mount

Put your QD sling exactly where you need it.

This low profile rock-solid attachment locks quickly anywhere onto any MIL-STD 1913 rail system.

\$32.95

Includes blackened stainless steel push button QD swivel.

Internal lugs prevent swivel from over-traveling and twisting the sling.

- Weight: 1.33 oz.
- Length: .5"
- Width: 1.25"
- Accepts SSQD Swivel
- Sling size: up to 1 1/4"
- Mounting platform: Picatinny
- Material: 6061 T6 Aluminum
- Coating type: MIL-A-8625 Type III Class 2 Hard Coat Anodized w/ Teflon

## IWC QD End Plate

This low-profile end-plate replaces the standard flat end-plate with one that features a quarter inch QD socket that has **rotation limited geometry built into it.** This a **great single-point sling hard point.** Made of **billet steel**, avoiding the rough edges found on laser cut or stamped plates. Black Melonite coating prevents rust, corrosion and wear.

NOTE: This plate will only fit "Mil-Spec" Extension Tubes.

Made in USA. Sling swivel not included.

\$18.95

[www.LaRue.com](http://www.LaRue.com)

# Cagulowa

**“Carries Gun Long Way”** This fine hand-crafted leather carry handle loops around the front and rear of a mounted riflescope, providing a great way to effortlessly carry your rifle on long hikes afield...as if your rifle was a briefcase. The soundless leather assembly easily fits to the front and rear of most scopes. Remove the crossbolt and simply slip it over the scope, then reinsert for strength and security. The rigid and reinforced carry handle provides a comfortable place to grip along your rifle’s center of gravity. Six adjustment points provide the user the ability to shift the center of gravity forward and back. All leather surfaces contacting your scope are the softer “suede” side to insure quiet traction. When shouldering the rifle the entire assembly quietly rotates out of the way. Quality cowhide leather, heavy saddle-quality stitching, and solid brass saddle-quality hardware will last generations. Made in America by fine Americans. (patent pending) **\$39.95**

## IWC 45 Offset Rail QD Sling Mount

45 Degree Offset design recesses the Quick Detach Socket as close to the centerline of the weapon as possible for maximum

clearance. Directly attaches to all Picatinny MIL-Spec 1913 & STANG Rails. Compatible with all Push Button QD Sling Swivels.

**\$29.95**

## IWC KeyMod QD Sling Mount

Direct attach design attaches to Forends with KeyMod Modular Direct Attachment System.

**\$17.00**

## LAW Tactical AR Folding Stock Adapter Gen 3-M

The Law Tactical Folding Stock Adapter works with direct impingement or gas piston systems. Fits A2, carbine, mil-spec or commercial buffer tube and stocks. Can be used with standard bolt carrier groups including: full auto, semi auto, 5.56 to .308.

Simple one-button release folds the stock. To engage, just unfold and fire. Stock automatically locks into place. Integrated single-point sling attachment point included.

Designed, built and assembled in the USA from CNC machined 4140 steel.

**\$259.00**

## SureFire Maximus Rechargeable Variable Output LED Headlamp

Rechargeable Li-Ion with variable-output LED up to 500 lumens. Knurled control dial. Chargers for wall AC outlet and 12-volt DC included. Tough, lightweight magnesium body rotates up and down 90 degrees. Comfortable to wear, thanks to its no-chafe fine-weave headband and moisture-wicking Breathe-O-Prene forehead pad. Built-in SOS beacon can run for days.

**\$249.00**

## First Aid Kit With Pouch

- Re-Sealable Poly Bag
- Celox (15g, stops bleeding fast)
- CavArms Tourniquet
- Emergency Bandage (Israeli Bandage) 4"
- 4.5" x 4.1 yards Kerlix Gauze 1"x10 yds
- Hypoallergenic Tape
- Nitrile Gloves
- 2 Alcohol Preps

**\$74.95**

[www.LaRue.com](http://www.LaRue.com)

## Tactical Medical Solutions Downed Operator Kit

There is no excuse to not have this medical kit on you anytime you're at the range or shooting.

Easily fits into a cargo pocket or in your range bag, it has the basic essentials to sustain an injured person until they are able to receive medical treatment.

The DOK is a compact kit that contains the items essential for treatment of serious injuries encountered by law enforcement and military personnel. The DOK is compact enough to fit in a cargo pocket or glove box. It can also mount to a roll bar/ protective shield in a patrol car or tactical vehicle.

The DOK is packed in a heavy weight re-sealable bag allowing easy replacement of individual kit items. Kit components can also be periodically inspected without damaging the integrity of the packaging. The kit contents can be modified to meet your individual requirements or several pre-packed kits are available with or without hemostatic agents.

- SOF@Tactical Tourniquet-NH
- Olaes@ modular bandage
- Each Olaes@ bandage contains: 3 meters of sterile 4 ply gauze.
- Plastic occlusive sheet included in dressing pocket.
- (Transparent pressure cup that focuses pressure on the wound and acts as an eye cup for treatment of eye injuries)
- Face shield
- One pair of Nitrile gloves
- 2" Tape
- 5.5" Trauma shears

\$39.90

[www.LaRue.com](http://www.LaRue.com)

## Tactical Medical Solutions R-AID Bag

Stocked to provide life-saving treatment for multiple casualties, the R-AID bag is ideally suited to work as an **assault aid-bag, vehicle bag, or combat lifesaver bag**. All critical intervention items are loaded in the top flap of the bag

for immediate access. The second main compartment contains items required for additional treatments and casualty packaging. The rear sleeve contains triage and casualty marking materials. The bag provides one of the most compact, comprehensive treatment kits available.

**The contents of the kit provide a trained individual with the following capabilities:**  
Hemorrhage control

Basic and advanced airway management

Packaging of burns

Treatment of penetrating chest trauma

Splinting

Treatment of eye injuries

Triage and casualty marking

\$337.95

Cont'd from P. 15

reticle is still centered. This allows the best part of the glass to be used for the majority of your shots. This is done with the proper use of bias.

Scopes normally have the reticle centered for travel when it leaves the factory. This means you lose half the overall travel if shot from a flat base with flat rings. But this is still available if you are smart enough to bias your action or your scope mount. The standard adjustment is 20 moa and this now gives you 65 moa or 19 mils of elevation before you zero.

This amount of travel will allow even a 308 past 1000 and better calibers with higher BC's to go even farther with the capability to dial everything they desire for elevation for even the long shots.

As I spent time on the range with the scope, I noticed the really nice glass and good parallax adjustment with the capability to return to zero as I tested it on the range. This was what I expect from a NF scope, and it is a quality you don't get in all scopes. A lot of scopes may have a parallax knob that is there but never seems to do anything. Also, lesser quality scopes can lack the ability to return to zero or dial correctly. The NX8 is a real performer you can count on.

- 8x zoom range, 4x to 32x magnification

- First Focal Plane (FFP/F1) reticle

- ED (Extra-low Dispersion) glass for superior image quality

- 50 mm objective lens for maximum resolution and low-light use

- Compact length at 13.4"/340mm

- 30 mm body tube

- Parallax adjustable from 11 yards to infinity

- ZeroStop elevation adjustment for rapid and easy return to zero

- 10 MRAD/20 MOA per turret revolution

- 26 MRAD/90 MOA of total elevation adjustment

- Capped windage adjustment

- Integrated PTL (Power Throw Lever) - Locking diopter adjustment

At a price around the \$2000 mark, I believe this is a huge contender for your next scope purchase. At least I know it is for me. I told them I wanted to buy one with the T3 as soon as it was available, and they said it would be out in the fall. I can't wait to get it on my hunting rifle as I think it is a perfect fit and does everything I need a hunting scope to do.

-Todd Hodnett  
Accuracy1st

[www.LaRue.com](http://www.LaRue.com)

## The Glock Aimpoint Micro Mount

Allows you to wield the same world class reflex sight used by Law Enforcement Professionals and Open Class Shooters worldwide, in the palm of your hand. Simply remove your existing rear sight and **install the Glock Aimpoint Micro Mount** into the factory dovetail and the "Shooter is ready.... Standby....BEEP!!"

Weighing in at a feathery 84 grams, the Aimpoint Micro is one of the lightest, fastest, and most durable and dependable red dot sights on the market. The Micro allows you to fire with both eyes open, without worrying if you're focused on the target or focused on the dot. Make your selection of the T1, T2, H1 or H2.

\$63.00

## Armageddon Gear Pistol Pocket

A versatile solution to your security needs. Sticks to any flat surface with the included adhesive-backed Velcro square, or to any opposing Velcro field in a gun case, pack or other carrier. Your imagination is the only limit. Accepts any service/duty sized handgun such as the Glock 17 or Sig P229 or similar. Removable retainer strap keeps pistol in place while you're doing J-turns, PITs, or other crazy ninja moves in your mom's G-Ride.

\$29.95

## Chrome Silicon springs from Tactical Springs

offer exceptional quality and are as long lasting as they are durable. In an ideal range of popular weights for the 1911 Moly plated and cryogenically processed for extended duty cycle performance. Color coded for easy field ID of weight by operator. Packaged in hard plastic tubes

\$8.95

[www.LaRue.com](http://www.LaRue.com)

## Comp-Tac International Slide Holster

Combines belt holster, belt drop offset holster, paddle holster and paddle drop offset holster into one. Modular mounting system combines the versatility of different mounting options with the superior Kydex holster that Comp-Tac is known for.

Configured to the customer's specification at time of order and the additional mounting components are shipped with the order.

Available with three different cant options, the speed draw (straight drop), the FBI cant (grip angle forward), and the reverse/cross draw (grip angle rearward).

\$46.95

## Comp-Tac Flatline

Allows the user to carry *inside the waistband* or *outside the waistband*. All Kydex Construction. The two ridged pieces hold their shape for **easy, simple, and safe re-holstering** while carrying inside the waistband. The Flatline Clips are the most innovative on the market. The plastic material is flexible enough to withstand any bending and twisting without breaking and will be gentle on your belt, clothing and car seats. Flatline is shipped with 6 clips: Two Flatline Clips, Two Offset-Flatline Clips and Two Standard Clips in 1 1/2" belt width.

\$69.99

## Comp-Tac Twin Mag Pouches

One unique feature of our Twin Mag Pouch is that each pouch is **independently adjustable**, eliminating the problem of one side being too loose and the other being too tight. Another feature is that your magazines will be the same space apart from each other every time you go to reload. Some shooters may find that this will help them become more consistent in their reloads. Built for a 1.5" belt.

IDPA compliant. for Glock-9/40/357 Slide, S&W-M&P 9/40/357, Springfield-XD 40 Service/Comp 4", 1911-1911 Slide

\$33.99

## Comp-Tac Minotaur MTAC Holster

Glock-9/40/357 Slide, S&W-M&P 9/40/357, Springfield-XD Slide, 1911-1911 Slide

- Behind-the-hip
- For 1.5" belt
- Tuckable
- Adjustable Cant
- Slim Profile
- Adjustable Ride Depth
- Interchangeable Spare Bodies

The ultimate level of deep concealment. This "hybrid" holster combines the comfort of cowhide leather backing with a Kydex half-shell.

\$55.07

## Lula Magazine Loader for 9mm-45ACP

Fast, durable, military quality universal pistol magazine loader. Loads virtually all 9mm, .357 SIG, .40 S&W, 10mm and .45 single- and double-stack magazines.

Easy loading; rounds drop in with no fingers pushing or pressing them.

### Load hundreds of rounds painlessly!

Fast! Fill mags in 1/3 the time of thumb loading.

Fits in pocket, weighs only 66 grams (2.3 Ounce).

Does **NOT** load the following:

Mags with less than 8.0mm between their lips.-Glock G36 -6rd .45 SS (Single Stack) (Beak will not come out of mag.)-S&W 7rd 9mm SS (Does not enter between lips). May not load the last round in a few types of mags.

\$28.95

## Aegis Enhanced Belt (black buckle)- Ares Gear

Customers wanted a belt with the same performance as our Ranger belt, but a simpler "look". The same proprietary scuba webbing, with an added layer of 1.5" thin webbing on the outside. The Aegis buckle is beadblasted stainless steel.

All components are made here in the USA.

Purchase based on overall length (S=41", M=43", L=45", XL=47", 2XL=49")

Measure the distance from the hole that you most often use on your current belt to the farthest point on the buckle. That will give you the size of your belt, then add however much tail you want.

\$99.99

[www.LaRue.com](http://www.LaRue.com)

## LaRue Drag Bag

The ultimate drag bag / shooting mat. Designed at LaRue, with input from the shooting community. Bag converts to shooting mat.

Tired of lying in briars waiting for a target? Tired of going prone in less than sanitary conditions? Have you spent your last night sleeping with your head in the mud? Then the newly designed LaRue Drag Bag is for you!

The LaRue Drag Bag features MOLLE compatibility, fits into iM3200 Storm Case, has sewn on para-cord for

camouflage/burlap, a bipod catch, internal Velcro and MOLLE for pouch and accessory versatility.

\$329.95

Ideal for the AR-shooter who also brings pistols to the firing line. 1000 Denier Waterproof Cordura® nylon with closed cell foam at the bottom and ends of bag and Heavy Duty #9 YKK Zippers.

Two (2) Large Outside Pockets, each has Padded Pistol Insert w/ Magazine Pouches

Removable Padded Center insert w/Two (2) low-profile Adjustable Dividers

2" wide Shoulder Strap w/ moveable Comfort Pad

Padded Hand Grip, w/ Velcro enclosure

Hard Bottom to Prevent Sagging

Double Zipper Top w/ Roll-up Velcro Tab

Approx. 9"H X 7"D X 13"L  
Colors: Black, Tan, and Red  
Made in USA

\$99.95

## LaRue Scope Bag, Large

It's no secret that we provide our customers with some of the best optics available. Quick-disconnect mounts allow shooters the ability to take one rifle to the range with several optics. Most of the time, those additional optics are thrown in a range bag, a sock, or an ammo can. Everyone knows that precision equipment and physics do not mix well, so we set-out to design **the best, padded bags on the market today**, to help our customers protect their expensive hardware.

Each bag is over-padded with a generous ¾" layer of dense open cell foam on all sides. The Heavy duty YKK zipper makes opening and closing a snap, and will last a lifetime. The adjustable shoulder strap makes carrying your valuables easy, and keeps the contents in easy reach. MOLLE straps allow the user to attach these bags to chest rigs and soft cases with MOLLE Web.

In Black or Tan. Made in USA.

\$59.95

[www.LaRue.com](http://www.LaRue.com)

## Armageddon Gear Lightweight Headband Wrap

Lightweight Wrap provides layers of comfort and protection to significantly reduce temperature and heat transfer to your sensitive noggin. Trim and add little thickness to your muffs to ensure ease of use and comfort when worn under a modern combat helmet. Made in the USA!

In Coyote Brown and Black.

\$14.95

## MSA Supreme Pro-X Ear Muff

Neckband style is ideal for using under helmets and features a padded, wrap-around neck strap with adjustable low-profile cloth top strap. The Headband style wraps over the head traditionally, and features a padded, removable, camouflage band-cover. The MSA Supreme Pro-X Ear Muff offers fully waterproof microphones along with slim design cups.

\$299.95

## Armageddon Gear Armorer's Tool Kit Pouch

Designed and submitted as part of the SOCOM PSR Program, and now in military service as a field-maintenance Armorer's tool kit pouch.

**Holds everything you need to keep your rifle performing during extended missions.**

Holds ball-peen hammer or mallet, Snap-On (or similar) torque wrench, three T-handle drivers, and numerous small tools, spare fasteners, or other items in internal flap-closed pouch. Double-layer Cordura shell and oversized zipper.

\$79.95

\*Tools not included

## Armageddon Gear GP Utility Pouch

Fits perfectly in anywhere a double-M4 mag pouch would (two columns of PALS

webbing). Store mags, signals, NODs (where padding is not required), 650-cord tie-down point and internal

compartments for small items like batteries

- Holds three 30rd M4 mags or three 20rd 7.62x51 M110 mags
- 7.5" Tall x 4" Wide x 3.5" Deep
- Coyote Brown or Black

\$24.95

## Armageddon Gear Top-Zip Utility Pouch

A great all-around small utility bag. Built like a tank, it is the perfect shave kit pouch for the traveling warrior who wants to maintain a dapper, yet tactical appearance at all times. Holds toothbrush, toothpaste, tactical beard grooming kit (AKA Copenhagen), hair clippers, Gold Bond, med tape, or any other combination of man-cream and hygiene items you can tote. Fits nine fully-loaded LaRue 7.62 magazines inside. Your imagination is the only limit here.

\$39.95

## Armageddon Gear Kestrel Pocket

The Kestrel Pocket is purpose-built to securely protect your weather meter against bumps, scratches, dirt and debris. Your meter will ride snugly in a soft, fuzzy, and padded inner layer housed within a Cordura-covered hard-plastic outer shell. Webbing loop provides a convenient way to attach an ITW Tac Link or other tie-down so you don't lose your gear. Like everything Armageddon Gear manufactures, the Kestrel Pocket is made in the USA!

\$29.95

[www.LaRue.com](http://www.LaRue.com)

## OTIS Tactical Cleaning System:

What started in a shoe polish tin called "The Whole Kit & Caboodle," Otis has engineered into the **most popular firearm cleaning system on the market today.**

The Tactical Cleaning System is equipped to clean all rifles, pistols, shotguns, and in-line muzzleloaders. It has the essential tools to clean rifles .17 to .50 caliber, handguns .17 to .50 caliber, shotguns 410 to 12/10 gauge, and all in-line muzzleloaders. Includes three Memory-Flex® cleaning rods with over 750lb tensile strength, three forged slotted brass

tips, two obstruction removers, T-handle for added comfort, .5oz. tube of Otis O85® Ultra Bore® cleaner, lubricant and preservative, all-caliber cotton cleaning patches for .223 caliber and larger, small caliber patches for .17 to .223 caliber, shotgun brush adapter and rubber patch

savers® to get 360 degree coverage in your shotgun barrels, six high quality bore brushes, and a bore reflector/flag safety. Protect your investments; use Otis.

Caliber/Gauge: .17 - .50 Caliber Rifles; .17 - .50 Caliber Pistols; 410 - 12/10 Gauge Shotguns; In-Line Muzzleloaders.

Weight: 0.62 lbs.

Dimensions: 4" x 4" x 2.5

\$37.95

## TW25B, 12cc Syringe Lube/Mil-Comm Extreme Performance Synthetic Grease, Lubricant Protectant

The top-trusted favorite of U.S. Military fighters, leading law enforcement agencies, precision firearms manufacturers and sport shooters everywhere.

Proprietary PTFE nano-particle technology outlasts and outperforms other weapons lubricants. **Battlefield tested** in the heat and sand of desert war zones, and in the corrosive, saltwater environments of naval warfare, where weapons reliability is a life-and-death matter.

\$12.05

## Machine Gunners Lube

- Sets a new standard in small arms lubricants!

Functional from -100 to 1000 degrees.

Lube protects weapon in extreme environments subject to high heat, humidity, evaporative, and mechanical wear.

Does not evaporate at normal ambient temperatures - Ready when you need it.

Colloidal suspension of re-micronized molybdenum particles - No need for shaking, you are always good to go.

Long lasting moly particles still remain slick, and ooze out of the metal pores - Greatly reduces carbon build-up on bolt carriers.

Use GENEROUSLY, don't mix with other oils. Easy cleanup, leaves no residue. Great for pistols and carbines.

1 FL. OZ. (US) (28.5 ML)

\$9.95

## FireClean Ultra Performance Gun Oil - 2 fl oz

FIREClean is designed to hold as an oil to the highest possible temperatures, and provide the best possible lubricity across the applicable temperature spectrum.

FIREClean also conditions the metal deeply to provide inherent slipperiness or lubricity.

\$13.95

Otis all-caliber cleaning patches in an economical 30 pack.

\$3.49

## Calbico Channel Cleaning Tool, Model F1

A must-have for every range bag and cleaning kit. This is one of those widgets that appears simple, but will quickly become one of your cleaning essentials. The

Calbico Channel Cleaning Tool makes the hard work of removing crud from tight spaces a breeze. It can be used as a mild scraper, or by wrapping a solvent-soaked patch on either end, you can easily clean grooves, channels and tight spaces. The tool is made of a **non-marring, reinforced high performance plastic**. Two tip sizes are optimized for reaching into channels and cuts found in all types of firearms. Ribs on the handle provide a comfortable grip.

\$9.95

## Otis Grip Kit® Cleaning System

With the demand for the .223 with a collapsible stock, Otis has developed the Otis Grip Kit® Cleaning System. Reclaim the lost space in the standard handgrip of all AR15/M4/M16's. This is the civilian bright brass version of the military issue cleaning system. The essential Memory-Flex® cleaning rod, obstruction remover, slotted tip, T-handle, bore brush, and small caliber patches are neatly packed into the Otis Grip Kit®, making it the most portable cleaning system on the

market today. This kit also includes an anchor for the Otis Grip Kit® clip, a button head hex screw, and a hex wrench. Developed for lightweight special operations firearms, **bore cleaning and cleaning can be accomplished in seconds**. The set complements, and is fully compatible with, the extensive #223 AR15/M4/M16 cleaning system. This kit is also available in 6.8MM and 7.62MM. If your .223 Caliber/5.56MM has a collapsible stock, the Otis Grip Kit® is the cleaning system for you.

\$34.95

## Iosso Cleaning Kit

The Iosso Cleaning Kit contains 6 precision fit brushes. The brushes clean the Upper Receiver, Chamber, Bolt Carrier, Bore, Bolt Carrier Key Tube, and the Gas Tube. The Gas tube brush **cleans the entire length of the gas tube without disassembly of the upper receiver**. The kit also includes the Eliminator Cleaning Tool & Rod. This cleaning tool is handy for tight cleaning jobs where a regular rod is too long and cumbersome to use.

\$56.95

## CAT - Combat Applications Tool 5.56/7.62

This tool allows the operator to clean the weapon and **restore the bolt and carrier group to "tactical tolerance"** in a matter of minutes, in the field, with gloved hands, and in low light conditions if necessary. The CAT-762/556 features a Bolt Cleaner/Scraper, Firing Pin Cleaner, 1/4" Hex Head, Carrier Cleaner/Scraper with a Patch Hole.

While the CAT 762/556 fits many bolts (like the LaRue OBR) perfectly, due to very slight differences in bolts, the tool will fit some bolts better than others.

All bolts so far encountered have been restored to "tactical tolerance" quickly. Inspection cleanliness can be quickly achieved by the addition of solvent and a patch or two.

- 100% US-made
- Approximately 3.5 inches long
- Weighs roughly 1.5 oz
- Investment-cast from 300-series stainless steel

- Bolt cleaning chamber CNC machined to precisely fit a mil-spec bolt

# Trailer Hitch Cover

Now you can display your favorite bumper sticker...no matter how controversial, yet remove it when you're "behind enemy lines." Our handy trailer hitch cover has a large flat panel, specially designed to accept any standard bumper sticker up to 13 1/2 inches wide. It also has **two built-in bottle openers** that always come in handy. The gloss black powder-coated finish fights corrosion and looks good too!

Fits into any standard trailer 2" x 2" hitch socket.

Shucks fellers (ladies too), now you can become a dad-gum social chameleon.

*Here's what happened ...*

*I tried to give away a bunch of nice bumper stickers, just give 'em away I tell ya. Some of ya (a very few actually) went "Meh, thanks, but I don't stick stuff to my ride." Sooo, I studied the situation and came up with this here solution. And for you redneck's, I built-in a bilingu, er, uh, a left and right hand bottle opener. One could say it's a Tail-gater's companion piece. :^)*

*Anyhow, for them of ya that absolutely refuse to slip a nice patriotic bumper sticker onto your vehicle, worry no more.*

*Finally, here's my three step inventing process - 1.) You think of it ... 2.) You make some ... 3.) You commence selling 'em. :-)*

*All fun aside, enjoy.*

## Annoy a Liberal Today!

Printed on heavy "crack-n-peel" label stock with UV-resistant inks. Each measures 10" x 3", with an extra 3" x 1.5" LaRue Logo decal.

\$5.00 ea.

## An American Flag for Patriots...made here in Texas USA.

Believe it or not some folks are having Ol' Glory *made in China*.

Like you, we know this just ain't right and want to give Americans a **Flag made right here in San Antonio, Texas.**

At 3'x5' this weatherproof Flag is ideal for outdoor display.

Nyl-Glo ColorFast U.S. Flags will never change color. In fact, they are guaranteed to remain color fast for at least one year. Nyl-Glo U.S. Flags are made of SolarMax 200 Denier Nylon, the longest lasting Nylon flag material available anywhere. They have large, full size "dense-filled-embroidered" stars, double needle seams sewn with lock stitching for extra durability.

\$39.95

## Battle Mixer:

*First child on the way, and the nursery needed painting. That meant dripping, messy, wasteful mixing and pouring. There had to be a better way....*

### ***Invention time!***

*Purpose of Battle Mixer: Mixes paint thoroughly without mess. It also allows the user to pour, seal and store without drips. The lid prevents paint-drip into the lid channel, so you can replace the original lid without splatters. The Battle Mixer washes up easily for the next project.*

*Compatibility: Works on any standard 1-Gallon, 6 1/2" metal paint can*

Includes: Lid, Stir Sticks, Spout Cap

## The bottle that put Nalgene on the map.

And after all these years it is still Nalgene's best seller. It's design appears simple, but there are over fifty years of manufacturing experience that go into creating a *super durable, leak proof bottle*. Graduations help you keep track of your fluid intake, or serve as a useful guideline when mixing up a beverage in your Nalgene. Most backpacks have a pocket on the side to hold a bottle and those pockets were designed to accommodate a Nalgene bottle, because hikers have trusted Nalgene for over twenty years.

# We Triggered a Landslide 87

**LaRue TAC (Trigger Action Chassis) Combo**  
-Safely practice trigger manipulation without a rifle. \*grip not included.

## LaRue MBT™ Meticulously Built Trigger

**LaRue Tactical MBT-2S Trigger**  
In a world of instantly M.I.M.'d rifle and pistol components, we threw on the brakes, slowed to a walk, and built 2-stage triggers out of solid S7 tool steel plates. Meticulous triggers built by our staff toolmakers ... without a stopwatch in sight.

**New Straight Bow (SB)**

No question, we're particular about accuracy. Everyone knows that one of the smartest improvements an AR-owner can make to their rifle is a precision trigger upgrade.

Everyone also knows that LaRue Tactical has a track-record of doing things right. The LaRue MBT-2S was purposefully designed and manufactured to render the greatest benefits from our legendary line of accurate rifles. The MBT-2S can replace the stock trigger on any mil-spec AR lower receiver.

Sparing no expense, all major components are precision-machined from S7 Tool Steel. The result of this extra effort is a glass-smooth, hyper-consistent trigger that will satisfy even the most scrupulous competition shooter, but also be overly rugged for the battlefield. The MBT-2S breaks crisply at 4.5 lbs (2.5 lb first stage, 2 lb second stage) and has a smooth and positive reset. Made in-house, in Texas, in the USA.

NOTE: This trigger only works with Small Pin Lower Receivers.
