About LaRue

A well-known name to U.S. Military Snipers, "LaRue" is synonymous with auto-resetting sniper targets and quick-detachable mounting systems for every weapon-mounted optic, laser and night-vision device used by our Nation's Warfighters. LaRue steel Sniper Targets are available for calibers ranging from 5.56mm through .50 and are used to train the sniper community world-wide. LaRue also designs and manufactures weapon systems, including the 7.62mm and 5.56mm OBR (Optimized Battle Rifle), PredatOBR, and PredatAR Rifles. Almost every component is manufactured in-house, providing the ultimate in quality control that yields a consistent, hyper-accurate rifle.

LaRue's manufacturing facilities are located in Leander, TX, and are co-located with a 100-yard, wind and mirage-free, underground shooting and testing range, alongside a 100-yard general purpose training range. With over 100,000 square feet of manufacturing, LaRue operates over 150 CNC machines. LaRue has a proven track record of expertise in low-quantity rapid prototyping through high-quantity manufacture and delivery, including contracts that span several years. Our Management Team is a true Integrated Product Team, closely overseeing all aspects of production and systems integration, cradle to grave.

LaRue provides the U.S. Warfighter with the finest hardware available at the best value. Our specific niche is speed and agility in the production and delivery of field-worthy prototypes, integrating our patented Quick-Disconnect Speed Lever design into a variety of MIL-STD-1913-related products and accessories. The "repeatable" attributes of our manufactured hardware, even under the most harsh conditions and most rigorous abuse, have given LaRue a leadership reputation in the interface of optics, lasers, tactical lights, range-finders, etc.

OBR.

OBR 7.62 16"

The LaRue OBR® (Optimized Battle Rifle) was built from the ground up, using a newly designed upper-receiver platform. Both the upper and lower are CNC-machined from billet, for the optimum fit and consistency. The receiver components are designed with more material in critical areas to alleviate known issues of weakness in 7.62 platforms and to stiffen the receiver....translating into maximum accuracy.

OBR 7.62 18"

OBR 7.62 20"

PredatAR 7.62 16"

PredatAR.

The PredatAR® 7.62 is designed for those who are searching for a lightweight, ultra-reliable and accurate 7.62 mm NATO rifle for home defense, competition shooting or hunting. The PredatAR® takes the highly-accurate OBR® 7.62 "Heavy" design, and lightens it in every possible way with the least possible impact to the accuracy that the standard OBR is known for.

PredatAR 7.62 18"

7.62 Rifles

LaRue's product line of 7.62 sniper rifles has become the preferred rifle for the long-range shooting community. Over half of the teams that competed in a recent U.S. Army Special Operations Command (USASOC) Sniper Competition chose the LaRue 7.62 OBR® to compete with. All models feature LaRue-made barrels in a 1/10 twist rate.

PredatOBR 7.62 14.5"

PredatOBR.

PredatOBR 7.62 16"

PredatOBR 7.62 18"

The PredatOBR® 7.62 was designed for those who are searching for a hybrid cross between the standard OBR® and PredatAR® 7.62x51 Rifles. The PredatOBR® takes the highly accurate OBR® 7.62 design, and lightens it in every possible way with the least possible impact to the accuracy that the standard OBR® is known for.

The PredatOBR's barrel can easily be removed with the supplied Barrel Wrench. No need to remove the gas tube, gas block or muzzle device. Reverse the process to reinstall. Hand-tighten Barrel Nut and torque to approximately 40-50 foot pounds.

PredatOBR Roll-Up Bag

OBR®

OBR 5.56 16"

Building off the success of our highly-accurate and reliable OBR® 7.62, we set out to apply the same proven design features into a 5.56 rifle. The result is a lightweight, and reliable tack driver that remains cool...even after high rates of fire. Like its 7.62mm sibling, both the upper and lower are CNC-machined from billet aluminum, for the optimum fit and consistency...translating into maximum accuracy.

OBR 5.56 12"

OBR 5.56 18"

OBR 5.56 20"

PredatAR®

PredatAR 5.56 16"

PredatAR 5.56 18"

The PredatAR® 5.56 is designed for those who are searching for a lightweight, ultra-reliable and accurate 5.56 mm NATO rifle for home defense, competition shooting or hunting. By contouring the barrel, skeletonizing the handguard, lowering and simplifying the upper rail, and using a low-profile gas block, we were able to create an ultra lightweight rifle.

5.56 Rifles

LaRue's product line of 5.56 rifles are known worldwide for their legendary accuracy and reliability. All models feature LaRue-made barrels in a 1/8 twist rate, threaded in 1/2 x 28, with an A2 flash hider attached (other muzzle devices can be added at an additional cost). On all models, LaRue has eliminated the conventional AR barrel nut and bolts the handguard directly to the proprietary upper receiver, creating a true "free-float" barrel.

PredatOBR 5.56 18"

PredatOBR 5.56 14.5"

PredatOBR 5.56 16"

PredatOBR®

Like its 7.62 sibling, The PredatOBR® 5.56mm's barrel can easily be removed with the supplied Barrel Wrench. No need to remove the gas tube, gas block or muzzle device. Reverse the process to reinstall. Hand-tighten Barrel Nut and torque to approximately 40-50 foot pounds.

The zero MOA upper rail provides plenty of room for weapon-mounted night vision day/night combinations. Both the upper and lower are CNC-machined from billet aluminum for the optimum fit and consistency.

Rifle Components

When building a rifle, you shouldn't settle for less. It's well known that LaRue offers some of the finest components on the market. In fact, they are many of the same components that go into our legendary rifles. LaRue has always set the bar high with the finest design, engineering, and machining. These components are built to the most stringent specifications, for the most demanding customer looking to complete the highest quality builds.

LaRue Stealth Upper Assemblies

Assembled using our CNC-machined Stealth Billet Upper (LT-007) as the backbone, complete Stealth Uppers are available in 12", 14.5", 16", 18", & 20"; barrel lengths with the LT handguard length of your choice. Complete Stealth Uppers come expertly assembled and tested with Receiver, Free-float Handguard, Barrel, Low-Profile Gas Block and Tube, Mil-Contract M16 Bolt Carrier Group and Charging Handle.

LaRue Stealth Upper Receiver

These CNC-machined billet uppers are A3-style (A3 style means no M4 feed ramps, everything else is the same). Comes complete with forward assist and dust cover.

LaRue MBT-2S Trigger

Sparing no expense, all major components are precision machined from S7 Tool Steel. The result of this extra effort is a glass-smooth, hyper-consistent trigger that will satisfy even the most scrupulous competition shooter, but also be overly rugged for the battlefield. The MBT-2S breaks crisply at 4.5 lbs (2.5 lb first stage, 2 lb second stage) and has a smooth and positive reset. Made in-house, in Texas, in the USA.

LaRue Handguards

LaRue's two-pin proprietary barrel nut system with its locking anti-slip plate, sets LaRue handguards apart from the competition. Once properly installed, there is no chance of movement whatsoever. The handguards also include integral QD sling-swivel sockets at the base of each side for convenient mounting 2-point slings. Additionally, our free-float rail system provides an excellent heat-sinking feature that pulls throat-damaging heat away from the chamber area.

Riflescope Mounts

LaRue QD scope mounts are well known and respected world-wide as the gold standard of high quality. Your scope mount is just as important as the scope itself. While many LaRue designs have been copied, no other company has come close to the level of repeatability and precision LaRue is known for.

Combo Packages

LaRue is well known for their variety of combo packages. Many of the finest optics and flashlights on the market can be purchased with a LaRue QD mount that is designed precisely for that item. We take the guesswork out of finding the correct set up. If we offer it, you know it's going to be good.

Hard & Soft Cases provide storage and protection for just about any fire-arms configuration.

Mag Pouches and Holsters of the finest types available put your gear where you need it.

Hearing Protection for all types of shooters.

First Aid Kits and battlefield medical accessories.

Range Accessories

The quality of our range accessories go hand-in-hand with rifles and optics. We have meticulously taken the guesswork out of what items are critical accessories needed at the range. Everything from cleaning kits to rangefinders can be found with ease and confidence.

Rangefinders that give you accurate distance to target, without breaking your budget.

Kestrels and cases providing the most precise information available for long-range shooters.

Cleaning Kits that keep your fire-arms operating at a peak level.

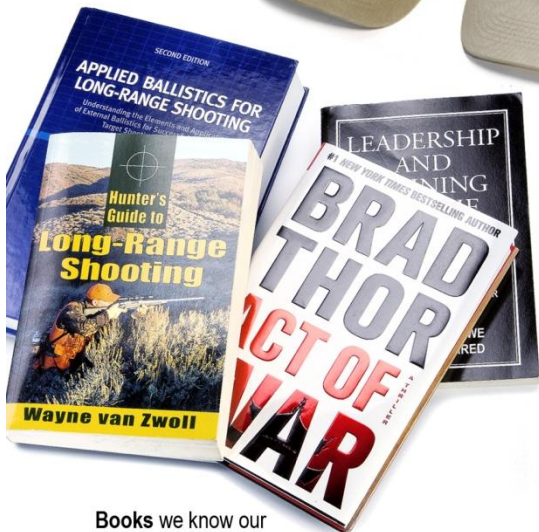

Training Tools that keep your skills sharp.

Chronographs and accessories provide shooters and reloaders with critical ballistic information.

LaRue Hats feature two sewn-in utility loops that help to keep eye wear from sliding off the brim and also out from under earpro. The Velcro backstrap adjusts to almost any size head. There is also an opening on the brim's base for flashlights with reverse retention clips (like the SureFire Backup).

Books we know our customers will benefit from and enjoy.

Battle Mixers mix paint thoroughly without mess. It also allows the user to pour, seal and store without drips. The Battle Mixer washes up easily for the next project.

Stickers of all types, with decidedly conservative undertones.

Visit www.LaRue.com for pricing and details

Apparel & Misc.

Show your LaRue pride with our full array of LaRue-branded products. We also have a growing collection of hand-picked and sometimes "off-the-beaten-path" items that are sure to appeal to every LaRue fan.

Nalgene Bottles that will let everyone on the hike know where you stand.

Morale Patches add that touch of LaRue anywhere Velcro is present.

Beverage Entry Tools, aka "Dillos", are known world-wide. Opening your favorite beverage just isn't the same without one.

Knives of all types, with a tactical appeal.

LaRue Shirts are made from 100% Cotton, with the LaRue Tactical Texas Logo on the left chest and "God Bless Our Troops... Especially Our Snipers!" on the back.
